

NEW! New Holland Guardian™ Rear Boom Sprayers

SP.240R SP.275R

Attack pests and cover acres quickly with a new Guardian™ rear boom sprayer from New Holland. An affordable price, simple design and easy maintenance increase your return on investment.

Wide coverage, high clearance

You can handle huge areas in a hurry with models that cover up to 120 feet with each pass and tanks that hold up to 1200 gallons. And, you can spray late in the growing season with the crop clearance of up to 48 inches. Wrap-around rear windows give you outstanding visibility to the spray boom.

Rugged simplicity

Heavy-duty frame and axle construction and the simple, mechanical drive system lead to reliable performance and peace of mind. The simple drive system transfers more power to the ground for higher productivity and better fuel economy.

Smooth ride, traction and maneuverability

An industry-leading 15-foot turning radius allows for easy maneuvering in tight spaces and effortless

headland turns. Four equal-size tires provide a better ride, better turning and less compaction. The fully suspended rear axle provides a full 11 inches of suspension travel for an extra-smooth ride.

Quiet, efficient power

New Holland sprayers are powered by quiet, proven Cummins engines. Choose between 240- or 275-horsepower models. Both use a unique single-pass cooling system with modules that are stacked vertically instead of layered front to back. Cooling air flows through all the modules at the same time for maximum cooling and maximum efficiency.

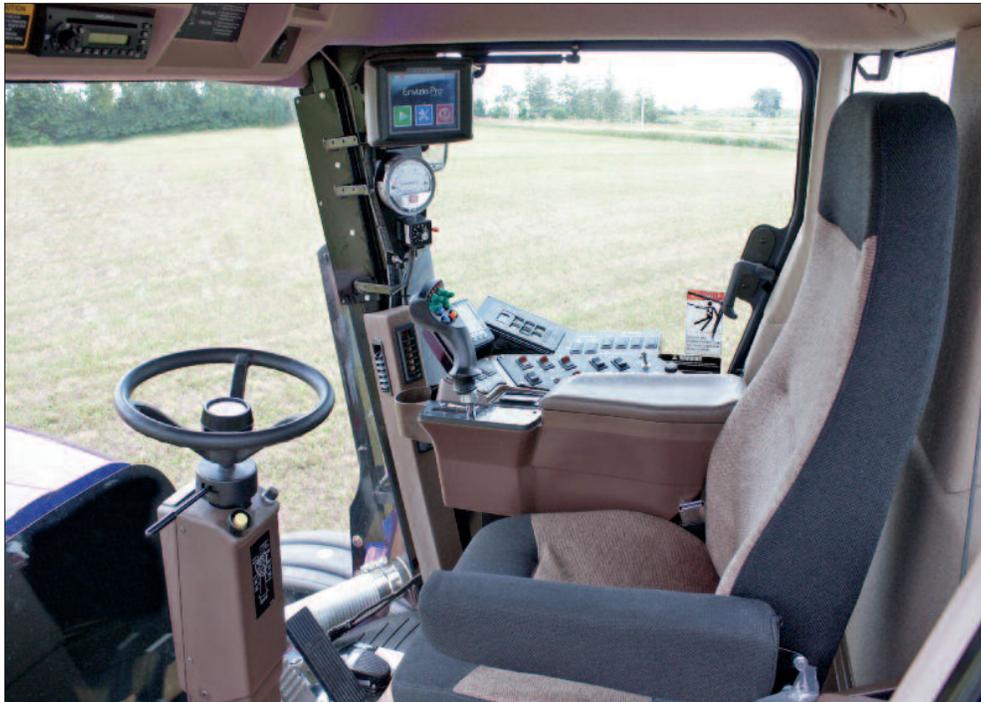

High-performance options:

- **Front-wheel assist option** is available on the SP.275R for added traction on-the-go.
- **Optional hydraulic tread adjustment** allows you to change wheel spacing between 120 and 150 inches from the cab.

Guardian™ Rear Boom Sprayers Specifications
