

DO NOT RISK YOUR MACHINE'S LIFE. BUY CNH INDUSTRIAL GENUINE PARTS!

Air Filters

The function of Air Filter is to clean the air as it passes through the filter element or filtering media and eliminate dirt particles that can enter through the air intake system. This prevents abrasive contaminants in the air system from damaging engine parts.

KEY BENEFITS

- SUPERIOR CONSTRUCTION
- CELLULOSE FILTER MEDIA TECHNOLOGY
- HIGH EFFICIENCY AND DURABILITY

Outcome of using NON GENUINE air filters

PRODUCTION LOSS

INCREASE OF OVERALL MAINTENANCE COST

MORE COMPONENTS REPLACEMENT COST

WHY CNH INDUSTRIAL GENUINE AIR FILTERS

CNH Industrial Genuine Filters are built by using highest quality materials and the most technologically advanced processes which ensure contamination free air flow and consistent engine performance. Good filter materials used also guarantee strength and protection against damage.

Inherent Characteristics

- Superior Construction
 - Designed to meet all application requirements for both engine and cabin air filtration
- Cellulose Filter Media Technology
 - From specially formulated to nano fibre filter media
- High efficiency and durability
 - Wear protection for engine durability
 - Reduced fuel consumption and optimal horsepower use

GENUINE FILTER	WILL-FIT AIR FILTERS
99.99% Filtration Efficiency 0.1 gram dust	99.0% Filtration Efficiency 10 grams dust

Contamination levels of Different ISO 4606 Codes Vary Dramatically*

*Estimate based upon typical medium duty operating conditions with 92% pre-cleaner efficiency. Actual results may vary. According to ISO 5011.

Compare how much dust can pass through the air filter during 500 hours of operation*.

These dust vials show the actual amount of ISO fine test dust that passes through the air filter media for every 1 kilogram of dust fed to the air filter, which is the equivalent of 500 hours* of equipment operation.
