

DO NOT RISK YOUR MACHINE'S LIFE. BUY CNH INDUSTRIAL GENUINE PARTS!

Bearings

The word «bearing» incorporates the meaning of «to bear» in other words «to carry a burden». Function of a bearing is to connect two machine parts that move relative to one another in such a manner that the frictional resistance to motion is minimal.

KEY BENEFITS

- Increased load resistance due to high purity steel
- Dimensional stability with unique heat treatment
- High heat resistance with steel and acrylonitrilebutaiden seal

Outcome of using NON GENUINE bearings

PRODUCTION LOSS

INCREASE OF OVERALL MAINTENANCE COST

MORE COMPONENTS REPLACEMENT COST

CNH INDUSTRIAL GENUINE

- Premium Genuine Bearings to perfectly match your tractor's requirement.
- Optimized internal lubrication ratio for more durability.
- Low noise/vibration levels.
- Designed for consistent performance.
- Ensure original performance and reliability of your New Holland machine is maintained.

NON GENUINE

- Prone to have fitting issues and results in functional instability.
- Inferior lubrication resulting in less part life.
- Higher noise/vibration levels.
- Inconsistent performance.
- High failure rates.
