DV209D*
DV210D*
Flat-Out Amazing

Easy to operate, easy to maintain and easy on the operator, CASE asphalt compaction equipment is built for the daily grind without the daily grief. With dual-drum drive technology, high vibration frequencies up to 67 Hz, impressive maneuverability and standard features you won’t find elsewhere, these easy machines are hard to beat.

**DV SERIES**
- Pressurized Water System
- Standard Offset Drum Design
- Automatic Vibration Control
- Serviceability Second-to-None

**COMBINATION ROLLERS**
- Vibratory Front Drum
- Pneumatic Rear Tires
INSIDE THE LARGE DV
DV209D/DV210D

SWIVEL, SLIDE AND SPIN TO SEE
In addition to a seat that spins left or right and slides forward, the entire operator station – seat, steering console and drive lever – swivels almost 180° to reach both edges of the platform and provide operators a full view of the compacted surface, both drums and all spray bars.

COMMON-SENSE CONTROLS
Dual multi-function directional levers on either side of the seat allow for right- or left-handed operation. Automatic vibration control makes it easy to avoid surface damage from starting or stopping the machine. And if manual activation is preferred, it’s just a push of a button. Also, an adjustable speed control lets operators set a max speed so there’s no need to worry about going too fast for the frequency of the drum. The DV209D and DV210D feature a new intuitive and innovative in-steering wheel front display. This display provides all machine diagnostics for the operator to review. The operator structure is also completely redesigned to continue to offer excellent visibility to both drums while offering a comfortable and ergonomic operating environment.
Open ROPS work platform provides excellent visibility around the machine. Enclosed cab available.
INSIDE THE SMALL DV
DV23D/DV26D/DV36D/DV45D

FATIGUE-FIGHTING COMFORT
The operator’s platform is isolated from the chassis to reduce vibration from the engine and is on a heavy-duty rubber mount to help absorb shock.

SUPERIOR SIGHT LINES
All small DV models come standard with features to maximize visibility around the machine. For starters, a lateral-sliding seat with integrated operating lever gives operators a comfortable view of all drum edges while keeping controls within reach. A narrow front console and tapered hood improve forward visibility, while a flat-back design allows for a full view of the rear.

CONTROLS MADE SIMPLE
Operation is easy with a steering wheel and a single lever controlling forward/reverse travel, sprinkler activation and the vibration system, which allows for automatic or manual start/stop of drum vibration.
DOMINATE WITH LARGE DV ROLLERS
DV209D/DV210D
SUPERIOR WATER SYSTEM
Water plays a crucial role in preventing surface damage and keeping rollers clean. That’s why every component of DV rollers’ spray system is built to be the best.

- Triple Filtration – Filters at the tank, pump and nozzles help prevent spray-stopping clogs and prolong component life
- Pressurization – Maintains even water flow to all nozzles regardless of grade
- Standard Back-Up Pump – Ensures uninterrupted production with primary and back-up pumps
- Multiple Water Settings – Matches water pressure to the job at hand
- Dual Fill Ports – Offers convenient access from either side

HIGH-FREQUENCY OPTIONS
The CASE high-frequency option features a low amplitude setting that is ideal for thin-layer asphalt compaction at faster speeds. Thinner layers of asphalt tend to cool quicker and use smaller aggregates that can be crushed if too much force is applied. This option increases the versatility of the DV209D and DV210D by increasing the range of applications and asphalt mixes on which they can be used.

IMPRESSIVE MANEUVERABILITY
CASE large DV rollers come standard with a hydraulically adjustable “crab steering” system that can offset the rear drum. In addition to that, a heavy-duty, roller-style articulation joint allows the machine to oscillate +/-10° to maintain drum-to-ground contact. Together, these features enable superior operation around corners, over bumps or dips, and in confined areas.
SAVE TIME WITH SMALL DV ROLLERS
DV23D/DV26D/DV36D/DV45D
SUPERIOR WATER SYSTEM
Just like their big brothers, our small DV rollers are designed with the highest-quality water system.
+ Dual Filtration – Water is filtered at both the fill point and midway through the water cycle, reducing the amount of debris that can make it to the spray nozzle
+ Pressurization – Maintains even water flow to all nozzles regardless of grade
+ High-Capacity, Corrosion-Proof Tank – Runs all day on a single tank
+ Multiple Water Settings – Matches water pressure to the job at hand

STANDARD OFFSET DRUM WITH EXCELLENT CURB CLEARANCE
The front drums of our small DV rollers are positioned about two inches off center from the back drum, allowing for a tighter turning radius, while both drums have a balanced design and a tapered edge to reduce tearing around curves and during transitions.

INDUSTRY-LEADING PERFORMANCE
Dual frequency is standard on all small DV models, with dual amplitude standard on DV36D and DV45D – helping generate outstanding compaction on any surface. An electronic control module smoothly moves the rollers forward or reverse, unlike direct-link cables, which can lurch and create waves in the compaction surface.
MAINTENANCE MADE EASY

SERVICEABILITY IS IN OUR DNA

When you invest in CASE equipment, you need it to last. We make it simple. CASE DV Series rollers are no exception. From their open-access hoods to grouped, ground-level checkpoints, you can do daily maintenance in a matter of minutes. It’s the easiest way to help you get the most performance and longest life out of your machine.

Easy access to DV

1. Spin-on fuel, oil and hydraulic filters
2. Vertical-lift rear hood (Large DVs)
3. Drive motor or eccentric motor
4. Heavy-duty articulation joint
5. Engine
6. Oil fill
7. Dual fill ports (Large DVs)
8. Spray nozzles
9. Greaseless Teflon articulation joint (Small DVs)
10. Flip-forward hood (Small DVs)
11. No tool access, swing out doors
SUPPORT COMES STANDARD

BASE & EXTENDED LIMITED WARRANTY COVERAGE:

1-YEAR/UNLIMITED-HOUR FULL-COVERAGE
BASE LIMITED WARRANTY

2-YEAR/2,000-HOUR EXTENDED LIMITED
ENGINE WARRANTY
Discuss the extended engine warranty coverage details with your dealer.

UPTIME SOLUTIONS
Your CASE dealer can provide solutions to meet all your needs and keep you productive.

STRONGER PRODUCT SUPPORT SOLUTIONS
Your CASE dealer knows best how you can maximize your equipment investment and uptime—with genuine CASE parts, expert service and a complete range of product support solutions including CASE remanufactured and all-makes parts. CASE supports better parts availability and faster deliveries through nine parts distribution centers in North America and a forecasting system to ensure that the right parts will be there when you need them. And only CASE dealers have exclusive access to the Electronic Service Tool (EST) that quickly pinpoints machine issues. Just ask your dealer for details.

FLEXIBLE FINANCIAL OPTIONS
Specialized finance programs and flexible leasing packages put you in the driver’s seat of industry-leading CASE equipment while no-nonsense warranties and comprehensive protection plans ensure that your equipment is protected. As the only finance company dedicated to CASE, we offer strong products and services designed around your unique needs and are the only ones supported by the helpful service professionals at your CASE dealer.

*Please see your CASE dealer for limitations, exclusions and confirmation of policies in effect.
Available on large DV Series rollers, CASE SiteWatch™ telematics breaks the boundaries of fleet management by allowing you to monitor and manage multiple machines from your office, wherever that may be. No more manually tracking down engine hours and fuel levels. Get real-time performance metrics, idle-time analytics, scheduled maintenance intervals and programmable security alerts sent to any computer anytime, anywhere.

BUILDING A STRONG CASE

Since 1842, we at CASE Construction Equipment have lived by an unwavering commitment to build practical, intuitive solutions that deliver both efficiency and productivity. We continually strive to make it easier for our customers to implement emerging technologies and new compliance mandates.

Today, our global scale combined with our local expertise enables us to keep customers’ real-world challenges at the center of our product development. This focus has led to numerous innovations like Ride Control™, EZ-EH controls, blade shake, PowerLift™, over-center boom design and the peace of mind that only CASE ProCare provides.

Every CASE machine is backed by more than 300 North American dealer locations, thousands of OEM, remanufactured and Gold Value™ parts, and flexible financing and insurance options that provide the kind of reliable, steadfast support you expect from a professional partner.

We are passionate about improving the lives of others, whether investing in our veterans or raising awareness about local infrastructure initiatives through Dire States. Our goal is to build both stronger machines — and stronger communities.

At the end of the day, we do what’s right by our customers and our communities so that they can count on CASE.
