CUSTOMER SUPPORT

Get peace of mind with Case Care PlusPacSM, a prepaid maintenance plan for your machine.

The Case dealer: Your professional partner

Start with world-class Case machinery and attachments. Your Case dealer will help you work smarter and faster by selecting equipment that delivers performance and operator comfort. Your dealer has the knowledge and experience necessary to help you choose the right attachments so you can...

- Work faster and extend equipment life.
- Increase machine utilization.
- Increase your capabilities.

Let your Case dealer service your machine on the jobsite. You'll be back on the job faster. Advantages include...

- Responsive job site service to keep your equipment running.
- Increase machine uptime.
- Certified service staff and improved parts availability.

Manage your equipment better. The Case Care PlusPacSM is a prepaid maintenance plan designed especially for your machine. Factory-trained Case technicians perform routine

inspections and regular service to prevent problems. Other plans, such as the Machine Protection PlusPacSM, can be purchased to extend protection beyond the base warranty. Add the GlobalTRACS[®] Fleet Management Communications System to give you the information to better manage your fleet while protecting it against theft.

Ask your local Case dealer about adding value to your machine and peace of mind to your workday with these helpful products.

The user-friendly controls reduce operator fatigue and increase productivity.

CASE DV SERIES TANDEM DRUM VIBRATORY ROLLERS

Simple to operate, highly productive

Case DV Series compaction equipment is user-friendly, reliable, durable and easy to service and maintain. High centrifugal forces combined with dual frequencies deliver maximum productivity on projects such as streets, driveways and parking lots. Machined, tapered drum edges provide a smooth transition between passes.

Other features include hydrostatic drive to both drums, infinitely variable speeds up to 8.5 mph (13.6 km/hr), manual or automatic vibration modes and choice of front or both drum vibration. Recessed hydrostatic drum drives provide high curb clearance for excellent maneuverability.

The uncomplicated operator environment with user-friendly controls reduces operator fatigue and increases productivity. A multi-functional, single lever direction control also has a vibration on-off button. The operator is isolated from

machine vibration with flexible shock absorbers between the operator's platform and the chassis.

A foldable ROPS increases the DV Series machines' versatility by enabling them to work in areas with low over-head clearance.

The pressurized sprinkler system features polyurethane water reservoirs and adjustable Vulcolon scrapers. The sprinkler control has adjustable intervals for maximum water efficiency.

The DV Series also provides excellent serviceability with unmatched access to external engine components and routine maintenance points for lower maintenance costs.

The DV Series from Case — outstanding compaction performance in an operator-friendly, easy-to-maintain package. See your Case dealer for detailed specifications.

Excellent lines of sight and a seat that can be shifted laterally, makes very precise work easy to do.

Conveniently located and accessible engine compartment makes routine maintenance simple.

TANDEM DRUM VIBRATORY ROLLERS QUICK SPECS

DV201

Engine	31 net hp (23 kW)
Operating weight	5,510 lb (2500 kg)
Wheel base	67.6 in (1716 mm)
Drum width	39.4 in (1000 mm)

DV202

Engine	31 net hp (23 kW)
Operating weight	5,950 lb (2700 kg)
Wheel base	67.6 in (1716 mm)
Drum width	47.2 in (1200 mm)

DV204

Engine	48 net hp (36 kW)
Operating weight	7,720 lb (3500 kg)
Wheel base	67.6 in (1716 mm)
Drum width	51.2 in (1300 mm)
