E SERIES COMPACT WHEEL LOADERS

21E | 121E | 221E | 321E

Great things come in small packages, and the Case E Series compact wheel loaders are no exception. Loaded with innovative features and backed by the Case commitment to durability and customer support, these machines are designed around the way contractors work. Their power, size and maneuverability make these compact wheel loaders ideal for a variety of landscaping, industrial material handling, recycling and residential construction applications – or anywhere compact size and high performance is needed.

Spacious comfortable cab

Climb into the contoured cab, and you'll think you're sitting in a full-sized Case wheel loader. Designed to fit the operator, the cab is loaded with comfort, safety and easy-to-use controls that boost productivity. Curved glass in front and rear, along with a sloping rear engine compartment, provide superior visibility.

Versa-Boom linkage improves reach, visibility and lift

The Versa-Boom design provides increased attachment work range and bucket rollback for greater material retention. Visibility to the coupler and attachments is also enhanced throughout the lift cycle for precise positioning.

Skid steer-compatible coupler boosts your productivity

The hydraulic skid steer-compatible coupler system lets you quickly connect and release many Case skid steer attachments right from the seat of the cab. Plus, features like a single-lever loader control, hydraulic steering and a simplified control center increase machine utilization, material retention and productivity.

Quick and easy maintenance

Case compact wheel loaders are built to deliver years of quality operation. Maintenance done right improves reliability and extends machine life. Oil changes are quick with a spin-on oil filter and remote drain. The flip-up rear hood provides ground line access to the engine and all recommended daily check points.

E SERIES COMPACT WHEEL LOADERS

21E | 121E | 221E | 321E

Roomy, comfortable cab

A spacious, ergonomic operator environment features tinted, curved glass, tilt steering wheel column, fully adjustable suspension seat and conveniently located right-hand console controls.

Versa-Boom linkage

Reach height with the Versa-Boom linkage has been increased by 10 percent—51.7 in. (7 ft. height, 45° dump) on the 321E—which is helpful when loading out trucks or filling hoppers. The longer reach also allows you to easily work from one side of a flat bed truck when unloading palletized material.

Easy operation

The single-lever loader control (forward-neutral-reverse joystick with transmission speed button) put all controls at your fingertips. The hydraulic steering and articulated frame deliver superior maneuverability.

Tier 3-certified engine

Case engines are built for endurance and performance. Powering the E Series compact wheel loaders is a high-torque, four-cylinder, Case 3.2 L Tier 3 engine that provides plenty of power to move more material per hour. These machines deliver between 50 and 77 net hp (38 and 57 kW).

Ride Control option

Ride Control™ provides excellent material retention and machine control over the roughest terrain, while reducing shock loads on the machine and operator.

High-speed option

The high-speed transmission on the 121E, 221E and 321E can produce a top speed of 20 mph (32 km/h). The two-speed hydrostatic drive provides smooth shifting and easy operation.

Hydraulic skid steer-compatible coupler

Whether you're loading dirt, moving pallets, digging holes or cleaning the jobsite, the hydraulic skid steer-compatible coupler lets you quickly connect and release attachments – including many Case skid steer attachments.

Easy maintenance means more uptime

The convenient flip-up hood makes access to the engine compartment simple. Daily service checks are completed from ground level, making for a quick start to a productive day.

E SERIES COMPACT WHEEL LOADERS

21E | 121E | 221E | 321E

Superior productivity and efficiency

When you've got material to move and the clock is ticking, productivity and efficiency are crucial. Case compact wheel loaders are ideal for landscaping, nursery, residential construction, agriculture, industrial material handling and recycling jobsites.

These machines are loaded with high-production features that improve your uptime:

- The powerful loader linkage design provides high breakout force, strong lift capacity and fast cycle times.
- The two-speed hydrostatic drive delivers smooth shifting and ease of operation.
- The articulated frame provides a tight, 41-degree turning radius to get you into and around any job site.
- The limited-slip front axle automatically transfers power from the wheel that's slipping to the wheel that's gripping – regardless of ground conditions, giving you all the traction you need to keep on working.

Attachments provide outstanding versatility and flexibility

The ability to quickly attach and disconnect different tools is what makes the Case compact wheel loader so remarkable. All models feature a standard hydraulic skid steer-compatible coupler that lets you quickly change attachments from the cab.

Ask your Case dealer about the full line of attachments available for the E Series compact wheel loaders.

You can count on Case

You can count on Case and your Case dealer for full-service solutions—productive equipment, expert advice, flexible financing, genuine Case parts and fast service. We're here to provide you with the ultimate ownership experience.

Case pride

You can take pride in the Case name on your machine. It's backed by more than a century of productivity and performance. Case and your Case dealer are here for you, not only when you buy the machine, but also after you put 1,000 or 10,000 hours on it.

A rich, proud history

Case Construction Equipment's heritage spans more than 165 years. Growing from J.I. Case's innovations with steam-powered machinery in the late 1800s, Case developed road-building equipment that helped create early 20th century streets and highways across the world. By 1912, Case was well on its way to establishing itself as a full-line equipment manufacturer. The company continued to expand its construction equipment business over the years.

Celebrating a tradition of innovation

In 1957, Case produced the world's first integrated loader/backhoe made and warranted by one manufacturer. Over the decades and into the 21st century, Case has continued to develop a long line of industry firsts and has taken a leadership role in pioneering new products and solutions. Today, Case produces 15 lines of equipment and more than 90 models to meet your toughest construction challenges. Supported by manufacturing and sales in more than 150 countries, Case serves the needs of our customers worldwide.

Coast-to-coast customer support

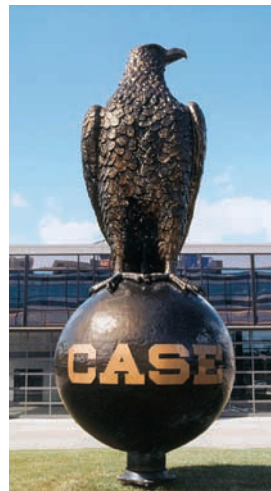

In North America, Case equipment is sold and serviced by more than 375 dealer locations. No matter where you work, we're here to support and protect your investment and exceed your expectations.

To locate a Case dealer or learn more about Case equipment or customer service, go to www.casece.com or call 1-866-54CASE6.

It all adds up. You can count on Case.

E SERIES COMPACT WHEEL LOADERS

Model	21E	121E
Engine	50 net hp (38 kW)	60 net hp (45 kW)
Operating weight	10,173 lb (4615 kg)	10,849 lb (4921 kg)
Max. bucket capacity	1.0 cu yd (0.9 cu m)	1.0 cu yd (0.9 cu m)
Lift capacity @ ground	9,368 lb (4249 kg)	12,134 lb (5504 kg)
Breakout force	7,801 lb (3,538 kg)	9,337 lb (4235 kg)
Biodiesel	B5 or B20*	B5 or B20*

Model	221E	321E
Engine	69 net hp (51 kW)	77 net hp (57 kW)
Operating weight	11,947 lb (5419 kg)	12,676 lb (5750 kg)
Max. bucket capacity	1.3 cu yd (1.0 cu m)	1.4 cu yd (1.1 cu m)
Lift capacity @ ground	11,146 lb (5056 kg)	13,355 lb (6058 kg)
Breakout force	9,723 lb (4410 kg)	11,241 lb (5099 kg)
Biodiesel	B5 or B20*	B5 or B20*

* B20 approved following Case guidelines for biodiesel blends above five percent.

NOTE: All engines meet current EPA emission regulations.

NOTE: All specifications are stated in accordance with SAE standards or recommended practices, where applicable.

IMPORTANT: Case Construction Equipment Inc. reserves the right to change these specifications without notice and without incurring any obligation relating to such change. Availability of some models and equipment builds vary according to the country in which the equipment is used. The illustrations and text may include optional equipment and accessories and may not include all standard equipment. Your Case dealer/distributor will be able to give you details of the products and their specifications available in your area.

 **SAFETY™ NEVER HURTS** Always read the operator's manual before operating any equipment. Inspect equipment before using it, and be sure it is operating properly. Follow the product safety signs and use any safety features provided.
