FARMALL B

23 - 57 HP THE COMPACT WITH IMPACT

FREE 22L CASE IH ESKY
WITH EVERY FARMALL B TRACTOR PURCHASE*

FARMALL JXM

55 - 88 HP FARM ALL YEAR ROUND

FREE 33L CASE IH ESKY
WITH EVERY FARMALL TRACTOR PURCHASE*

DESIGNED SPECIFICALLY FOR:

- LIVESTOCK INDUSTRY
- LIFESTYLE INDUSTRY
- HORTICULTURE INDUSTRY
- SPECIALTY APPLICATIONS

The new Case IH Farmall JXM Series tractors reliably and cost-effectively deliver the power and performance owners expect, and all feature the distinctive Case IH premium design. These tractors meet the demand for rugged yet comfortable and easy-to-operate equipment to get day-to-day jobs done, and are equally suitable to all types of farming businesses from utility to flagship tractor in a small farm. The four models offer 4WD and feature a range of transmission options.

- Outstanding horsepower in its class to handle the tough conditions
- Powered by the proven FPT fuel efficient 3 and 4-cylinder engines that offer class leading torque
- A choice of transmissions and shuttle allow you to select the right specification to meet your requirements
- Ergonomic layout provides comfort and convenience

Transmission	Synchronesh with Power Shuttle 12 x 12			
	Synchronesh with Creeper & Power Shuttle 20 x 20			

DESIGNED SPECIFICALLY FOR:

- LIVESTOCK INDUSTRY
- LIFESTYLE INDUSTRY
- LAWN CARE INDUSTRY
- SPECIALTY APPLICATIONS

While Case IH Farmall B Series tractors are compact, they're big on premium features that leave the competition behind. That means powerful 3 and 4-cylinder engines, independent electro-hydraulic PTO and deluxe 3-point hitches. It also means modern styling, plenty of leg room, tilt steering wheels, plus outstanding visibility, maneuverability and serviceability.

- Wide choice of transmission options from Hydrostatic to Mechanical
- Powerful and fuel efficient 3 and 4-cylinder engines offer exceptional performance
- Outstanding comfort and ease of operation
- Advanced design provides enhanced performance with rugged reliability

Case IH has over 175 years of agriculture experience, during this time we have gained an understanding of what farmers need. That's why we continue to collaborate with farmers to create utility tractors with characteristics like maneuverability, visibility and handling at the top of the features list. The Farmall JX Series delivers this and much more with four models in both cab and ROPS configurations.

- **Powered by Tier 3 turbocharged and intercooled engines which provide optimum fuel efficiency and maximum power**
- **With a choice of HP models, design configurations and a suite of transmissions available to suit all your needs**
- **Compatible with a range of loaders which along with the hydraulic shuttle option offers smooth direction changes and increased productivity**
- **The high visibility roof screen, fitted as standard, makes it ideal for loader work**

TRACTOR MODEL	JX 75	JX 90	JX 100	JX110

-  LIVESTOCK INDUSTRY
-  SPECIALTY APPLICATIONS

Case IH Farmall C Series tractors are hard-working, heavy-duty, utility tractors with flexible options to handle any application. These reliable tractors deliver full power, full comfort and full features which are ideal for demanding livestock duties, larger hay operations and heavy loader work. Farmall C tractors can be configured for all types of work with five models available in both cab and ROPS configurations.

- **Powered by FPT 4-cylinder turbocharged and intercooled engines to deliver improved efficiency and greater fuel savings**
- **With a choice of HP models, design configurations and a suite of transmissions available to suit all your needs**
- **The standard high visibility roof panel and sloped hood provide best in class visibility when performing loader work and when operating in confined spaces**
- **Cab models are designed for maximum comfort with enough room for both the operator's swivel air suspension seat and an instructor's seat as standard**

Farmall M ActiveDrive 4 tractors offer a unique package in which every single detail has been meticulously designed, with superior features and innovations engineered to meet your future needs. With ActiveDrive 4 transmission the Farmall M true power comes to life. With a host of features to ensure high levels of operating efficiency and comfort the Farmall M offers superior performance under any conditions.

- **The ActiveDrive 4 transmission offers a smooth-shifting semi-automatic 16x16 transmission with easy gear change between the range, creeper 32x32 option also available**
- **Powered by Tier 3 turbocharged and intercooled engines which provide optimum fuel efficiency and maximum power with a 145-litre fuel tank standard**
- **The hydraulic shuttle option offers smooth direction changes and with the twin steering cylinders standard it makes light work of loader tasks**
- **Comfort is paramount with a spacious cab with air conditioning, ergonomic control levers, air suspension seat and sunroof**

GENUINE LUBRICANTS

TESTED, VETTED AND READY
TO REVOLUTIONISE THE INDUSTRY

GENUINE FILTERS

QUALITY GUARANTEED

Today's modern, low emission engines are more efficient and more powerful than ever before. Increased performance means engines run at higher temperatures and require high-performance lubricants to protect components from premature wear.

NO. 1™ ENGINE OIL

As a safeguard against premature wear, our genuine No.1 Engine Oils™ have been specifically engineered to new, next generation MAT 3571, 3572, 3622 specifications. Our oils have been extensively tested to provide maximum protection in oxidation and aeration control, shear stability and proven performance life for the heavy-duty, high-temperature operation of agricultural and other off-road diesel-powered equipment.

KEY BENEFITS

- Our No.1 Engine Oils™ are the only lubricants bench tested, field tested and approved by CNH Industrial engineers in severe lab conditions, and under load in extreme field testing.
- Demonstrated resistance to thermal breakdown under high temperatures and excellent cold weather starting.
- Proven wear protection to maximise engine efficiency and help prolong engine life.
- Extended oil drain interval capabilities allowing you to maximise uptime when you need it most.

No.1 Engine Oil™ SAE 10W-40 API CK-4 MAT 3571
Available in 5L, 20L & 209L

No.1 Engine Oil™ SAE 15W-40 API CK-4 MAT 3572
Available in 5L, 20L, 209L & 1,000L

No.1 Engine Oil™ Super SAE 15W-40 API CI-4 MAT 3622
Available in 5L, 20L, 209L & 1,000L

WHAT DOES THE MAT NUMBER ON YOUR OIL CONTAINER MEAN?

The MAT designation on your oil container is what differentiates it from the competition. It certifies that genuine Case IH engine oils have passed our series of stringent, internal tests. The internal technical standards that are applied in testing go above and beyond the minimum API requirements – demanding more from our products. As a result, MAT specifications are used to test and approve all lubricants to ensure they exceed industry standard, meet the demands of machines and help extend component life.

That's why the Case IH choice for oil is documented in the operator's manual and approved for warranty claims. Only those MAT specified oils can make that claim.

NOT SURE WHICH LUBRICANT PRODUCT TO USE OR HOW MUCH?

Visit **Lube Lookup**, our online tool to assist you in identifying the lubricants and volumes required for your Case IH equipment.

ENGINE OIL FILTERS

Did you know?

Our genuine engine oil filters:

- Are 70% more efficient in filtering critical contaminants using our MicroLoc™ synthetic media compared to paper-based media
- Allow filtered oil to reach the engine quicker with improved cold flow
- Deliver high soot tolerance and dirt-holding capacity for greater filter life

For best performance, always use with genuine engine oil.

FUEL FILTERS

Did you know?

As fuel travels through a typical fuel system, it picks up dirt and water that is harmful, or even deadly to your engine. A typical litre of fuel can contain over five million contaminants.

Few things impact equipment productivity faster than a low-quality fuel filter.

Extremely high injection pressures and tight tolerances of today's low-emission engines make them highly sensitive to even the smallest amount of water or contaminants. With pressures as high as 30,000 psi, contaminants act as an abrasive jet, capable of eroding fuel pump and injector surfaces.

CASE IH ADVANTAGE

Today's tier four certified engines require fuel to be 100x cleaner than engines built just a few years ago.

Our genuine fuel filters feature advanced design and go through extensive testing to optimise equipment protection and performance.

- MicroLoc™ synthetic media delivers high-efficiency filtration that removes up to 99.7% of contaminants.
- 2x more dirt holding capacity extends the service life of your equipment.
- Offers better injector and fuel pump protection by eliminating more contaminants than competitor filters.
- Patented self-venting drain valve on fuel/water separators dramatically improves removal of free and emulsified water.

THE 30-60-90 HORSEPOWER RULE

Off-road equipment generates more usable horsepower – 30% more than on-road trucks and 60% more than automotive engines. Tighter tolerances and higher temperatures than ever before result in severe duty cycles. Therefore, off-road engines require high-quality filtration and increased durability.

Case IH Maxxum Series tractors are star performers with a proven track record of outstanding horsepower, fuel efficiency and operator comfort. The Maxxum operator environment provides superior visibility, ergonomic controls and optional cab suspension to maximise in-field performance. Designed to handle the multiple tasks of livestock operations, row-crop applications and baler work with ease, Maxxum tractors are a true example of power and performance made simple.

- New Maxxum Stage V models offer sharp fresh styling and improved lighting
- A choice of FPT tier 3 or Stage V engines with multiple transmissions to satisfy every customer
- New Maxxum features include True Power Shuttle, Active Clutch II, Shuttle Memory, Headland Management II, AccuTurn, Adaptive Steering, ISOBUS and full AFS compatibility
- Maxxum Multi-controller (Maxxum MC) awarded Tractor of the Year with best ever fuel efficiency measured in a 4-cylinder engine

TRUST THE CASE IH TECHNICIANS. IT'S WHAT WE DO.

A REMARKABLE HISTORY - DRIVEN BY INNOVATION

- The first steam engine tractor
- The first row-crop tractor: the Farmall family
- The first spindle cotton picker
- The first 4WD articulated tractor: the Steiger family
- The first Axial-Flow combine
- The first sugarcane harvester
- The first Advanced Farming Systems technology

CASE IH TODAY - A GIANT OF THE INDUSTRY

Case IH is a global leader in agricultural equipment. With headquarters in the United States, Case IH has a network of more than 4,900 dealers and distributors that operate in over 160 countries.

In Australia we have more than 100 dealer branches across the country. We pride ourselves not just on our superior product range but also the high standard of our dealer network.

SERVICE BY CASE IH

GENUINE EXPERTISE. GENUINE CARE.

Only your local Case IH dealer is trained by the organisation that made your machine and is well-versed in the latest, most comprehensive service and diagnostic techniques. Your dealer can spot important maintenance issues before they become costly repairs and offer preventative maintenance and warranty plans that guarantee the lowest cost-of-ownership over the life of your machine.

Case IH dealers can offer advice on selecting and financing the right machine, will ensure they deliver what you need when you need it, and will then continue to back you and your equipment with the service and spare parts backing you'd expect from a name as trusted as Case IH.

LEADING WARRANTIES

FOR YOUR PEACE OF MIND

Case IH equipment is produced in world-class manufacturing facilities. We stand by our products and trust they'll deliver years of productivity for your farming operation.

As well as our standard manufacturer's warranty¹, we also offer our RedXtend on many Case IH machinery models.

When the unexpected occurs, you need to know your equipment is protected. At Case IH we understand the importance of your machinery being in good working order when it counts. Case IH RedXtend is a purchased service contract designed to help keep your equipment working well beyond the manufacturer's base warranty period while taking away the concerns of the cost and inconvenience of mechanical failure.

Plans can be customised to meet individual needs and the plans may be financed through CNH Industrial Capital.

CASE IH PARTS

GENUINE PARTS FOR GENUINE PERFORMANCE

The thing about non-genuine parts is that you never know when they're going to let you down. Only genuine Case IH parts are made for your machine and are designed to promote peak performance. From crucial wear parts to everyday maintenance products, everything you put in your machine matters. You most likely chose Case IH for its reliability and performance. It's therefore critical to keep it a Case IH. We engineer, manufacture and choose parts based on the strictest design and testing standards.

And for those looking for a high quality, low cost alternative to original parts, Case IH dealers have a complete range of Reman Parts. Re-manufacturing gives you the opportunity to purchase replacement assemblies and components that are just like new at a reduced price and with a competitive warranty.

FINANCE

THE EQUIPMENT FINANCE SPECIALIST

We're proud of our heritage, which reflects our strong ties with the Australian agricultural industry.

As the financier of choice for Case IH dealers and customers globally since 1957, CNH Industrial Capital has been financing the needs of the Australian market since 1979.

40 years on, our legacy stands us in good stead. We know the market, we know the equipment and we know our customers.
