THE HEART OF FARMING BEATS RED

FARMALL®
23 - 115 HP TRACTORS

A REMARKABLE HISTORY

DRIVEN BY INNOVATION

In 1842 Jerome Increase Case founded the Racine Threshing Machine Works in Racine, Wisconsin. He innovated the current thresher and separated the straw from the grain. From that moment on, Case IH has continued to lead the industry in innovation:

- The first steam engine tractor
- The first row-crop tractor: the Farmall family
- The first 4WD articulated tractor: the Steiger family
- The first rotary combine: the Axial-Flow
- The first sugarcane harvester
- The first Advanced Farming Systems technology

CAS

A close-up, low-angle shot of the front grille of a Case IH vehicle. The grille is made of a dark, perforated metal mesh. In the lower-left foreground, the Case IH logo is prominently displayed. The logo consists of the letters 'E' and 'H' in a stylized, three-dimensional font. The 'E' is silver with a black outline, and the 'H' is black with a red vertical stripe running through its center. The lighting is dramatic, highlighting the texture of the grille and the metallic surfaces of the logo.

CASE IH TODAY

A GIANT OF THE INDUSTRY

Case IH is a global leader in agricultural equipment. With headquarters in the United States, Case IH has a network of more than 4,900 dealers and distributors that operate in over 160 countries.

In Australia we have more than 100 dealer branches across the country. We pride ourselves not just on our superior product range but also the high standard of our dealer network.

**WE'VE GOT THE LAND IN OUR BLOOD
NOT EVERYONE IS MADE LIKE US
WE'RE MADE TO DO OUR BEST
AND FIND WAYS OF DOING IT BETTER
WE'RE MADE TO KEEP OUR WORD
AND LOOK A PERSON IN THE EYE
THROUGH CHALLENGES AND TRIUMPHS
WE'RE MADE TO TRUST EACH OTHER AND
WORK TOGETHER
BECAUSE THE HEART OF FARMING BEATS RED**

FARMALL®. PROVEN SINCE 1923.

THE HISTORY OF FARMALL

BORN OF THE LAND ALMOST 100 YEARS AGO, THE FARMALL NAME IS ONE OF THE MOST ICONIC AND ADMIRIED BRAND NAMES IN THE FARMING WORLD.

Built to be affordable for small to medium-sized family farms, most Farmall tractors were general-purpose tractors which could readily perform a multitude of farming tasks – reducing the need for hired hands, eliminating the need for horses, and making Farmall a tried-and-true leader in the trend toward agricultural mechanisation in the 20th century.

Helping to revolutionise productivity on farms with their all-round capabilities and affordability, Farmall machines became much desired and, with this success, were emulated by other manufacturers who quickly introduced similar all-purpose tractors...with varying success.

With its bright red colour a distinctive badge, the brand was seen everywhere across the progressive farming landscape during the 1940s and 1950s. Various new trends in farming after the 1960s ended the era of Farmall manufacturing, however many Farmalls stayed in farming service while many others were restored and collected by enthusiasts.

In these respects, the Farmall era never ceased – and in 2012, when Case IH reintroduced the famed Farmall name on a new line of compact tractors in Australia, the proven hard-working versatility and clever design that first revolutionised farming in the 1920s was reborn.

1923

International Harvester files patent applications for the first Farmall tractor, and hand builds 22 for testing by farmers. Thousands of horses will soon be out of work.

FARMALL

1931

Farmall F-30 is launched. A more powerful, three-plough tractor, designed for farmers with 200+ acres.

1932

Farmall F-20, with its larger engine and improved transmission, replaces the Regular.

Farmall F-12 is introduced. Design includes larger rear tyres and no drop-box for gears.

1937

IH switches colour from "battleship grey" to trademark red, responding to safety concerns from so many Farmall tractors on the road.

1938

Farmall F-14, featuring steering post changes and a faster engine speed, replaces the F-12.

1939

The famous letter series is launched – **Farmall M**, **Farmall H**, **Farmall B** & **Farmall A**.

1945

Extensive line of quick-attach implements is introduced.

1947

Farmall CUB launched for farms under 40 acres. The smallest Farmall but one of the most popular.

Farmall Super A replaces A.

1951

Farmall Super C replaces C.

1952

Farmall Super M replaces M. Diesel version is called **Super MD**.

FARMALL TODAY

1954

Farmall Number Series begins. **Farmall 100** replaces Super A; **200** replaces Super C; **300** replaces Super H; **400** replaces Super M. Replacement models **Farmall 350** and **450** introduced.

1965

Farmall 1206 introduced – first row-crop tractor to exceed 100 hp.

2012

Farmall relaunched into the Australian market

SOME THINGS NEVER CHANGE

Just like the first Farmall, 21st century Farmall tractors are designed to be versatile, powerful and productive.

READY FOR ACTION

Farmall B Series tractors deliver huge performance in a compact size, with their 3- and 4-cylinder diesel engines providing power ranging from 23 hp to 57 hp.

The versatile and agile **Farmall JX** Series has six models ranging between 70 hp and 110 hp, all designed to deliver their power precisely where it's needed most.

Farmall C Series offers a line of heavy-duty, deluxe utility tractors delivering 75 hp to 115 hp and giving you the power, comfort and features that make the hard jobs easy.

Whether working with mounted machinery, trailed equipment, with a loader or on transport duties, the **Farmall U** Series utility tractor can do it all - in true Farmall style.

EXCEPTIONAL SERVICE

Service and support comes from the professionals at Case IH dealerships. Unlike some other brands, Case IH's experienced dealer network is always ready to support you with the service know-how and parts you need.

CASE IH PROMISE

With the support of Case IH, the famed Farmall brand has been reborn; combining its tough, traditional reputation for hard work with new, cutting-edge technology to once again revolutionise productivity and performance on the land. Delivered through the skilled Case IH dealer network, with the superior support and service only Case IH dealers can offer, the iconic Farmall range delivers outstanding value to farmers across Australia.

1953

Farmall Super H replaces H.

1963

Farmall 706 and **806** models introduced.

2003

Case IH reintroduced the Farmall name on a new line of compact tractors, with the same hard-working versatility and ingenious design that first revolutionised farming in the 1920s.

FARMALL B 23 - 57 HP

AHEAD OF THE INDUSTRY, TO KEEP YOU AHEAD OF THE GAME.

While Farmall B Series tractors are compact, they're big on premium features that leave the competition behind. That means powerful 3- and 4-cylinder engines, independent electro-hydraulic PTO and deluxe 3-point hitches. It also means modern styling, plenty of leg room, tilt steering wheels, plus outstanding visibility, manoeuvrability and serviceability.

TRANSMISSION

The Farmall 20B and 25B offer a 2-range hydrostatic drive with variable speeds up to 15.7kph. Farmall 35B offers the option of 3-speed hydrostatic or 12x12 synchro with speeds up to 25kph. Farmall 40B offers a 16x16 synchro transmission with speeds up to 27kph. Farmall 50B the option of 3-speed hydrostatic or 16x16 synchro with speeds up to 27kph. And Farmall 60B ROPS and cab versions offer a 16x16 synchro with speeds up to 32kph.

ENGINE

With powerful, fuel-efficient 3 and 4 cylinder diesel engines providing horsepower ranging from 23 to 57 hp, Farmall B Series tractors offer outstanding performance which will help you carry out a wide range of tasks that would normally require a much bigger machine.

COMFORT

Farmall B Series tractors provide outstanding operator comfort along with ease of operation. From their redesigned ergonomic controls to their outstanding forward sight lines, these tractors offer a work environment that will make all those chores and long hours fly by.

PERFORMANCE

Sturdy, nimble, rugged and manoeuvrable, Farmall B Series tractors are built to make a hard day's work easier. Their advanced designs include enhanced forward visibility, electro-hydraulic PTO for flexible productivity and high-capacity hydraulics for fast steering and implement response times, while new larger fuel tanks mean more time working, not filling up.

FARMALL JX 75 - 110 HP

TRANSMISSION

Choose the transmission that best fits your needs from the wide range of transmissions available to suit any application. These include a 12x12 synchromesh, a 20x20 creep speed transmission or a 12x12 Power Shuttle, offering clutchless direction changes.

ENGINE

The Farmall JX Series range of tractors is powered by upgraded 8000 Series, Tier 3 turbocharged and intercooled engines, carefully tuned to provide optimum fuel efficiency and maximum power.

COMFORT

The driving comfort required to make day-long multi-tasking a pleasure is the focus of the Farmall JX. With an ergonomically designed cab or a no-nonsense ROPS platform configuration available to suit your needs, all essential controls are logically positioned and within easy reach to make time spent working more comfortable and more productive.

PERFORMANCE

With six models between 75 and 110 hp, whatever the power required by your business there will be a Farmall JX to fit your needs. Economical without compromising on power and durability, the Farmall JX Series is compatible with a range of loaders, offering you time- and labour-saving advantages.

THE NEXT GENERATION: VERSATILE, AGILE, POWERFUL

More than 170 years of experience in agriculture has given Case IH a clear insight into farmers' needs. We understand what it takes to help you produce food, fuel and energy and we do our utmost to bring you the technology to make that happen. That's why we've worked with our customers to create a range of utility tractors, putting characteristics like manoeuvrability, visibility and handling at the top of the features list. The result is the new Farmall JX.

FARMALL C 75 - 115 HP

BIG POWER AND PERFORMANCE IN A COMPACT, NIMBLE PACKAGE

Case IH Farmall C Series tractors are hard-working, heavy-duty, deluxe tractors with flexible options to handle any application. These utility tractors deliver full power, full comfort and full features and are ideal for demanding livestock duties, larger hay operations and heavy loader work.

TRANSMISSION

A wide range of transmissions are available so you can select the ideal one for your tasks. The Farmall 75C model features a standard 12x12 Power Shuttle, plus a creeper 20x20 Power Shuttle option. The Farmall 95C – 115C tractors come with a 24x24 Hi Lo Power Shuttle or an optional 40x40 Power Shuttle transmission with creeper.

ENGINE

Tough at heart with updated clean-diesel technology, the new Farmall 75C – 115C models use Tier 4A-compliant Case IH FPT 4-cylinder 3.4-L turbocharged and intercooled engines to deliver improved engine efficiency and greater fuel savings.

COMFORT

You'll work in comfort in the cab of the Farmall C Series. With ergonomically-designed controls, space to stretch out and an HVAC system with 10 well-positioned vents to help you stay comfortable, you'll power through long days and be more productive than you ever imagined.

PERFORMANCE

A heavy-duty, compact frame, durable components and plenty of power to the PTO will make it a pleasure to pull your Farmall C out of the shed every day. Add a loader and one or more of over a dozen available attachments and get even more out of your machine.

FARMALL U 105 - 115 HP

VERSATILITY WITH YEAR-ROUND CAPABILITY

With a more powerful engine delivering higher levels of torque and performance across the range, coupled with the proven design features of cab and transmission, new Farmall U Series is a force to be reckoned with. The high power-to-weight ratio and nimble manoeuvrability makes new Farmall U even better suited to the PTO-driven tasks, front loader operation and general haulage tasks of your operation.

TRANSMISSION

Farmall U models are equipped with a 16x16 40kph Semi-Powershift transmission which was developed by downsizing the proven Maxxum 16x16 transmission. An optional 32x32 creeper gear box allows speeds as low as 260 metres/hour, and all transmissions are equipped with Power Shuttle, which can be modulated for medium/fast response.

ENGINE

Farmall U Series tractors use Tier 4A-compliant Case IH FPT 4-cylinder 3.4-L turbocharged and intercooled engines. Precise electronic metering of fuel delivered with electronic high-pressure common-rail fuel injection for greater fuel savings while maintaining high horsepower levels.

COMFORT

A large, air-conditioned cab with 5.2m² glass area provides a superb operator environment. Inside, a comfortable driver seat and passenger seat take the stress out of the longest working day, while a logical control layout and clear concise information display complete the package.

PERFORMANCE

An extensive range of options including front loaders, front linkage and PTO, turf, industrial or agricultural tyres means your Farmall U Series tractor will arrive ready to work the way you want. Cab versions can also be customised with performance monitors and ISO connector to enable data transfer between tractor and implement.

WARRANTY

Case IH equipment is produced in world-class manufacturing facilities. We stand by our products and trust they'll deliver years of productivity for your farming operation.

As well as our standard manufacturer's warranty, we also offer our REDCover Plus Protection Plan on many Case IH machinery models.

When the unexpected occurs, you need to know your equipment is protected. At Case IH we understand the importance of your machinery being in good working order when it counts. The Case IH REDCover Plus Protection Plan is a purchased service contract designed to help keep your equipment working well beyond the manufacturer's base warranty period while taking away the concerns of the cost and inconvenience of mechanical failure.

Plans can be customised to meet individual needs and the plans may be financed through CNH Industrial Capital.

FINANCE

We're proud of our heritage, which reflects our strong ties with the Australian agricultural industry.

Offering finance on Case IH equipment in the Australian market since 1979, we understand the need for flexible financial solutions. Our in-depth understanding of the markets and our customers is what sets CNH Industrial Capital apart.

Working hard to understand our customers, their goals, their challenges and outlook on the future, the team at CNH Industrial Capital can tailor financial packages and solutions to match your unique business needs and circumstances.

Build and Grow your Future with CNH Industrial Capital.

LOADERS AND ATTACHMENTS

Case IH loaders are ready to work for you.

For your convenience, Case IH provides the option of two loaders. Choose from the heavy-duty Vision-Lift or the premium Prime-Lift, which are all manufactured to match the Farmall tractor line. Your dealer can help you choose the one that's right for you. Each model is standard with mechanical self-levelling and can be optioned with a 1800mm or 2100mm quick attach general purpose or 4-in-1 bucket and a standard bonnet bump guard.

ADVANCED INTEGRATED TECHNOLOGY

Our fully-integrated precision farming tools feature open architecture to work across your equipment platforms and crop windows. Precision systems have never been easier to use or more reliable, helping you make the most of short windows during critical seasons. Case IH AFS gives you built-in precision technologies to improve your productivity and agronomic performance while minimising input costs and helping you manage your risk.

SERVICE & PARTS SUPPORT

Case IH and our dedicated dealer network provide excellent support from day-one and throughout your ownership so you can rely on trained service professionals to maintain the productivity of your investment. Case IH Australia holds an inventory of over 150,000 genuine parts, with the ability to rebuild your entire machine from scratch. Parts are sourced nationally and internationally, with fast and reliable delivery to get your machine back in the paddock.

KNOWLEDGEABLE DEALERS WHO WORK WITH YOU

Your Case IH dealer understands that your ultimate goal is to optimise your ROI. That means matching the right horsepower, capabilities, tools and implements to your farm. Your dealer is here to recommend the appropriate options package and they'll even work alongside you to analyse results, field by field.
