CASE II AGRICULTURE

# EARLY RISER®

CASE

2130 STACK-FOLD PLANTER

DESIGN

AGRONOMIC

# **HIGH-EFFICIENCY PLANTING: COVER MORE GROUND IN LESS TIME**

The 2130 Early Riser planter is rebuilt from the ground up — from rugged row unit to industry's most accurate Precision Planting<sup>®</sup> technology. Five configurations ensure the perfect fit for high-tech strip-till and flood irrigation operations and specialty crops, such as cotton, peanuts and edible soybeans. Plus, an agronomically designed row unit provides accurate seed placement at your speed — up to 10 mph.

#### MORE ACCURACY.

- Factory-integrated Case IH and Precision Planting **technology** customized to your farm's soil types, terrain, fertilizer and chemical application needs, and crop residue management practices.
- Fully integrated in-furrow liquid fertilizer **delivery system** with tractor-mounted tank is specifically designed for the 2000 Early Riser series planter lineup.
- Low-maintenance, electrically driven metering system delivers accurate and consistent seed singulation, population and in-row spacing.
- Industry's only **flat-bottom seed trench** provides proper depth and more consistent seed placement while improving seed-to-soil contact.

#### MORE DURABILITY.

- **Rugged row unit** built for unrivaled accuracy and dependability — from 4 mph to 10 mph.
- Heavy-duty cast components stand up to increased speeds and tough, fast changing conditions.
- **26-inch toolbar clearance**, plus a **60 percent** increase in vertical row unit travel to accommodate rapid terrain changes.

#### **MORE PRODUCTIVITY.**

- Choose between **1.9-bushel on-row hopper** or new 50-bushel bulk fill tank for increased seed capacity.
- Reduced maintenance and tool-free crop changes and **adjustments** keep you in the field to cover more acres with greater speed and efficiency.
- Automatic and in-cab adjustments help you quickly adapt to unique field conditions:
- Automatic hydraulic downforce with DeltaForce®
- Speed-compensated vacuum adjust
- Floating residue managers with CleanSweep<sup>®</sup> air cylinders
- Air closing system adjust
- Wing downforce
- Auxiliary alternator automation
- Individual row shut-offs for seed and fertilizer
- Automatic curve compensated spacing

Seed Capacity	12R	16R	
Row Hopper	22.8 bu. (803 L)	30.4 bu. (1071 L)	
Bulk-fill	50 bu. (	1762 L)	

Cast-iron row unit is built with larger, common hardware and fewer parts.

conditions.

# **ONE ROW UNIT, MULTIPLE POSSIBILITIES.**

#### Downforce Management Options

Through up-or-down hydraulic pressure, automatic and row-by-row DeltaForce down force achieves consistent weight on the gauge wheels for unparalleled depth control. Or select air downforce with or without in-cab gauge wheel feedback.

#### - vSet<sup>®</sup> 2 Seed Meter With vDrive<sup>®</sup> Electric Drive Motor

Row-by-row overlap control and curve-compensated spacing deliver optimal seed singulation and spacing. A simple design provides tool-free crop changes and reduces mechanical drive components.

■ Advanced Seed Delivery<sup>™</sup> (ASD)

SpeedTube<sup>®</sup> maintains positive seed

control from the meter to the furrow

Industry's first in-cab closing system

down pressure adjust allows you to

properly adjust the trench closing for

for higher accuracy at your speed.

Closing System Down Pressure

optimal seed-to-soil contact.

Floating Residue Management System CleanSweep air cylinders allow for in-cab adjustments of residue manager ride to accommodate soil and residue

#### Opening System With Earth Metal<sup>®</sup> Blades

Larger diameter and thicker Earth Metal offset opener blades are stronger, sharper, longer-lasting and agronomically designed to slice through residue and tough soil conditions.

#### Furrow Management System

0

Pulled gauge wheels with soil relief grooves eliminate sidewall compaction and control soil flow through changing ground speeds. The furrow-forming point creates the industry's only flat-bottom seed trench.

#### Two-stage Closing System Inverted closing disks zip the trench closed, placing high-moisture soil directly onto the seed. The press wheel ensures proper seed-to-soil contact.

#### FIND THE PERFECT FIT FOR YOUR OPERATION.

- Irrigation: Pair with a Magnum<sup>™</sup> tractor that has guidance in reverse for better maneuverability. This helps you plant close to the water source without the risk of damaging your equipment.
- **Strip-till:** Efficiently hit tight spring planting windows with a planter that precisely follows strips, acres after acre.
- **Wide rows:** The 2130 Early Riser planter allows for 36-, 38- and 40-inch rows so you can plant all of your crops, from corn to cotton.
- **Multiple Crop Types:** The vSet 2 vDrive electric drive meter carefully handles a variety of crops, including cotton, corn, edible beans, soybeans, peanuts and sugar beets, so you put quality seed in the ground acre after acre.

#### STACK-AND-GO PORTABILITY.

- The **heavy-duty toolbar** is designed to hold up to high speeds and tough, fast-changing conditions.
- Weight is evenly distributed across the planter and tractor footprint, achieving constant pressure on the gauge wheels for accurate seed depth across varying soil conditions and speeds.
- Optional lift assist wheels further distribute weight.
- Fast, convenient stacking allows for **easy transport** from field to field and brings the planter closer to the tractor so you can back right up to the edge of the field and start planting.
- Gullwing option provides additional wing lift when planter is raised for more clearance on headland turns.

#### **CONVENIENT BULK-FILL TANK.**

- **Save 50 percent of the time** it takes to tender seed with on-row hoppers while tendering more effectively with one person instead of two.
- Carry 2.2 times more seed on a 12-row planter and 1.6 times more seed on a 16-row planter, when compared with on-row hoppers.

#### **EFFICIENTLY COVER ACRES.**

- the seed population.
- out when changing crop types.

■ New 50-bushel bulk-fill seed feeding system provides reliable seed delivery — no matter

Bulk-fill system is easy to fill and quick to clean

**New liquid fertilizer system** delivers accurate application and is available with row-by-row shut-offs.

■ **High-speed capability** — up to 10 mph — helps you get the crop planted during optimal planting windows; for example, you can cover 67 percent more acres by planting at 10 mph compared with 6 mph.

Quickly adapt to new field tillage conditions with in-cab adjustment options of row cleaner ride, row unit down force and closing system down pressure.

Speed (Miles per Hour)	Acres Planted/Hour <sup>1</sup>	In-field Efficiency	Acres Planted in 10 Planting Days <sup>2</sup>
6	18.9 A/hr.	100%	1,512 Acres
8	25.2 A/hr.	134%	2,016 Acres
10	31.5 A/hr.	167%	2,520 Acres

<sup>1</sup> «80-acre field planted with 12-row planter, 30-inch row spacing, tendering 50-bushel seed hopper for 34,000 population, and a 400-gallon liquid fertilizer tank applying 5 gallons per acre. Factors in headland turning.

<sup>2</sup> «8 hours per day spent in the field planting.

## **NEXT-GENERATION TECHNOLOGY:** TAILORED, FLEXIBLE, INTEGRATED.

#### PRECISION PLANTING.

- Factory-integrated **Precision Planting technology** gives you greater control over every square inch of your field.
- **DeltaForce** down force provides the most accurate seed depth across varying conditions and speeds, including the ability to lift row units in soft soil.
- **CleanSweep air cylinders** offer flexibility and enhanced performance to clear residue and improve emergence.
- A standard vSet 2 seed meter and vDrive electric drive allow precise per-row seed metering, including curve-compensated spacing and overlap control.
- **SpeedTube** uses a flighted belt to control the delivery of the seed from meter to furrow, eliminating the drop and tumble variability of traditional gravity drop tubes.

#### **ON-ROW LIQUID FERTILIZER.**

- New factory-integrated in-furrow liquid fertilizer delivery system maximizes your fertilizer investment.
- Fertilizer system is available through tractor-mounted tanks.
- Centrifugal pump accurately delivers prescribed rate across entire working speed range.
- Case IH Advanced Farming System (AFS) Pro 700 display manages system pressure and flow feedback.
- Optional row-by-row overlap control ensures precise application and reduced input costs.

#### ADVANCED FARMING SYSTEMS.

- Choose between the total planter control and continuous feedback available through the Case IH AFS Pro 700 display or add the **20/20 SeedSense®** monitor from Precision Planting.
- Single AFS Pro 700 display allows you to run six screens for controlling key equipment functions, including CleanSweep, DeltaForce, Advanced Seed Information<sup>™</sup> (ASI) and closing system down pressure.
- Optional ASI system allows you to monitor and map seed spacing in real time.
- Available **AFS AccuTurn**<sup>™</sup> technology provides hands-free, automatic and repeatable turns for increased accuracy and reduced operator fatigue.
- AFS Connect<sup>™</sup> 2-way file transfer seamlessly transfers precision data from your AFS Pro 700 to your home computer or trusted adviser.
