AGRICULTURE

FOR THOSE WHO DEMAND MORE

**THERE'S NO EQUAL.
DEMAND MORE.**

EXCEED YOUR EXPECTATIONS: DEMAND MORE.

As the pioneer of the four-track 4WD articulated tractor with our Quadtrac model, we've been leading the way for over two decades. Our experience puts us far ahead of the game, offering the most powerful tractors on the market, with our proven track system eliminating slippage between drive wheel and track, and the world's strongest continuously variable CVX transmission delivering the ultimate in low ground-pressure field work.

There's really no equal to the Case IH Quadtrac.

If you want to stay one step ahead, no matter what the weather brings, then ask your Case IH dealer for more information on our autumn offers.

BE A FARMER. WE TAKE CARE OF THE REST.

When you buy a Case IH machine, you can be sure not only that you've got the best product, but also that you've got the best dealer back-up behind you. Case IH dealers can offer advice on selecting and financing the right machine, will ensure they deliver what you need when you need it, and will continue to back you and your equipment with the service and spare parts supply you'd expect from a name as trusted as Case IH.

PRECISION & INFORMATION THAT PAYS

With our technology you can now oversee location, fuel use, fuel level and work rates of your machines, as well as sending messages to your operators and studying information in real time. Not only do our full telematics allows you to remotely monitor your fleet, our 2.5cm RTK+ signal with AFS AccuGuide simplifies your operations and improves accuracy. Everything is designed to enable you to make informed decisions that allow you to plan for your business.

FOUR TRACKS, FOUR REASONS TO CHOOSE CASE IH...

1

PROVEN STRENGTH AND DURABILITY

The Case IH Quadtrac tractors are built with the strength to meet the toughest conditions. With maximum power outputs of up to 692hp, these tractors offer the highest power and comfort standards combined with impressively low running costs. What this means is that you can pull wide, deep-working and power-hungry implements with ease, hour after hour without missing a beat. The Quadtrac is the ultimate drilling machine too, providing the highest capacity to drill large areas quickly, and CVT transmission to get up to speed quickly in smaller fields.

2

LOWER GROUND PRESSURE FOR THE BEST SOIL PROTECTION

Soil is your most precious asset – look after it and you'll improve crop establishment, growth and yields. The Case IH Quadtrac is designed to allow power and weight to be fully exploited without damaging your soil. The individually driven oscillating tracks result in excellent ground contact, unbeatable grip in soft and slippery conditions and very low ground pressure. The result is reduced soil compaction and great manoeuvrability – allowing full power turns on headlands without the soil ridging and compaction caused so often when turning tightly.

3 SUPERIOR COMFORT

When you are spending long hours in the cab, comfort is important. Quadtrac customers benefit from the biggest cab in the industry, with the best all-round visibility. The industry's first four-point cab suspension, along with seat suspension, guarantee a smooth ride and noise levels are extremely low, whilst climate control ensures the perfect working environment. There is also none of the forward and backward rocking nor sideways jerking commonly associated with a twin track machine. Meanwhile, the Case IH Multicontroller armrest puts 85% of the controls right at the operator's fingertips, including easy access to innovative technology such as the Case IH Advanced Farming System® (AFS) for advanced vehicle control and precision.

4 MEETING YOUR BUSINESS NEEDS

Quite simply, the power and productivity of the Quadtrac allows you to get more done in less time, maximizing output and ensuring the timeliness of field operations even when the weather does its worst. It's a flexible machine too – use all the weight for your heavy cultivation needs and take the weights off when carrying out top work drilling.

Add in the excellent fuel economy, together with full RTK guidance from the factory and telematics and you'll see the Quadtrac has been designed to keep your business right on track.

2 TRACKS + 2 WHEELS = 4 REASONS TO RELY ON THE MAGNUM ROWTRAC

We've put our twenty years of experience with the Quadtrac to good use, developing the Magnum Rowtrac which strikes the perfect balance between wheels and tracks and has significant advantages over a twin tracked option. With better flotation, improved manoeuvring and more flexibility, as well as being great value, this machine may well be the best solution for your farm.

1 **ULTIMATE MANOEUVRABILITY**

With its oscillating rear-track design the Magnum Rowtrac offers manoeuvrability and handling comparable to a wheeled tractor. With excellent weight distribution across four points of ground contact, this machine keeps the power on the ground through the tightest of turns, without scuffing.

2 EASY TO TRANSPORT

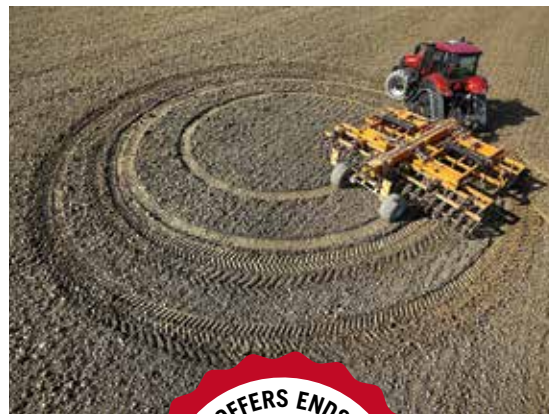

In the field, you benefit from a larger surface area than just tyres. However, this machine's narrow width makes it suitable for use on the road, staying legal and easy for road transport.

3 OPTIMUM COMFORT

Because the Magnum Rowtrac steers like a conventional tractor, operators avoid the skid steer jerking that can be felt from a twin track machine. It also avoids the forwards and backwards rocking that can be experienced with twin tracks. And because the steering does not interrupt the driveline, you get maximum tractive effort at all times and diff locks to help in sticky situations.

4 WORK WHEN OTHERS CAN'T

If you farm in a region where wet soil conditions can delay drilling and therefore crop establishment, Magnum Rowtrac will enable you to get on the land when other tractors cannot. The Magnum Rowtrac keeps four points of ground contact at all times which reduces surface pressure and means less weight transfer from front to rear than two-track systems. With tyre options that fit your row width and soil, you'll reduce soil compaction and rutting, whilst putting the power where you need it.

LONGER PLANTING WINDOWS, BETTER TRACTIVE POWER, REDUCED COMPACTION

THERE'S NO EQUAL.

With the late wet spring followed by a long period of dry weather, this year has been more challenging than most. When the window of opportunity for field work is reduced in this way, you need the most productive tractor you can get on your farm. Choose Case IH.
