

NEW HIGH DENSITY LB HD SERIES LARGE BALERS

After many years of experience with the LB XL series, Case IH has launched a completely new large-format "High Density" baler. The ambitious goal was 22% greater bale density while maintaining throughput as compared to the LB434 XL.

Numerous new features such as a patented two-speed gearbox, revised plungers, TwinePro twin-knot technology as standard, or a hydraulically suspended, steered tandem chassis all increase the efficiency of the baler and set standards in bale density and ground speed.

BRINGING DENSITY TO YOUR BUSINESS

Adjustable height hitch

DUAL AXLE HYDRAULIC SUSPENSION

■ Easy startup, less wear on tractor components

■ High productivity and less downtime caused by overloads

■ Smoother ride at high speed

CAPACITY & DENSITY

Concentrated technology for your feed

The steerable pick-up bar with a working width of 235 cm, 5 tine bars and perfect bale tine distribution reliably and cleanly picks up the swath even at higher speeds.

PRE-COMPRESSION CHAMBER

The perfect bale begins in the pre-compression chamber:

- Pre-compression of the material into stable flakes
- Sensor plate admits the material to the main compression chamber by the retention finger.

PLUNGER - NEWLY DESIGNED AND REINFORCED

- Extremely high pressures with 48 str./min
- Fully-automatic bale density control system gives the bales a uniform shape and density, even under changing conditions.
- Compression force is controlled by sensors and can adjust compression cylinders for constant bale density.

7 CYLINDERS

To achieve highest densities and bale weights, improvements were made:

- Extremely robust compression chamber
- High-performance density ring with7 double-acting cylinders
- Compression cylinder generates up to 62 t of force for uniform bale density, even in changing conditions

62t PRESSURE

PRODUCTIVITY & TECHNOLOGY

It's what inside that matters

ISOBUS CLASS III

Electronics also play a major role in the development of the LB 436 HD baler.

The baler meets the latest ISOBUS 3 standard (tractor speed control & overload management) so that its intuitive, newly-designed user interface can be accessed via any ISOBUS compatible terminal.

30% INCREASED LOOP KNOT STRENGTH

NEW LOOP KNOTTER

The new knotter system provides improved components:

- Redesigned needles and a new needle yoke reclaim system gives the bales a uniform shape and density, even under changing conditions.
- Stronger frame to withstand higher plunger loads.
- Electric knotter fans to keep the units cleans.
- TwinePro knotters can easily eliminate offcuts for better forage quality.

MID-GEAR BOX

- Accelerates PTO from 1000 to 1445 rpm.
- Flywheel brake and flywheel slip clutch.
- Allows smooth startup with 240 hp tractors.
- Automatic declutch in case of overload.
- Brake integrated into gear box for safer brake with significantly reduced risk of fire.

HANDLING & COMFORT

Our best case for high density bales

3 METERS WIDTH OVERALL

A fully redesigned heavy duty frame is able to withstand high density loads and higher plunger forces.

SHORT DRAWBAR

The narrow design of the new short drawbar provides an unobstructed view of the pick-up area and rotary cutter and makes the machine more maneuverable. The practical hose cabinet keeps all connecting hoses and cables organized.

DUAL AXLE HYDRAULIC SUSPENSION

The Case IH LB 436 HD is equipped as standard with a tandem axle with pivoting rear wheels for better maneuverability.

A brand new feature is Case IH's hydraulically suspended bogie-chassis with oversized tyres up to 26,5". This makes the machine easy to pull, even for lower HP tractors, saving fuel.

EASINESS & RELIABILITY

Less maintenance means lower costs

TILTABLE TWINEBOX

The demands for quality, servicability and reliability have been taken into account in every detail. The twine boxes pivot up and away for easy access to the main components.

The dust-proof twine boxes are large enough for 36 spools of twine, which can easily be restocked from the ground.

SERVICE WORK LIGHTS

A new work light and service light package is available on LB 436 HD balers, featuring modern, bright LEDs for maximum visibility, even in the darkest night.

LUBRICATIONS

The automatic lubrication system minimises downtime and maintenance work.
