

T7 RANGE STANDARD WHEELBASE

T7.175 | T7.190 | T7.210 | T7.225

Four models right for your farm.

The new T7 range was developed following intensive consultations with New Holland customers including contractors, arable and cash crop farmers. The aim was to produce a completely restyled tractor with improved functionality, while adhering to the even stricter Tier 4B emissions regulations. These improvements have made the T7 a true icon of tractor design, brimming with state-of-the-art technology, innovation, power and efficiency.

Ready to turn your needs into new features

New Holland engineers represent one of the best design teams in the world: skilled, open-minded people, always ready to turn your problems, needs and suggestions into new and efficient solutions.

Testing during development

Try and test. Then try and test again. Every T7 tractor undergoes severe and comprehensive tests during both the development and production processes, in order to deliver you the perfect working partner.

T7 Standard Wheelbase

Model	Rated Hp	Wheelbase mm	Weight kg
T7.175	140	2734	6750
T7.190	150	2734	6750
T7.210	165	2734	6750
T7.225	180	2734	6750

T7 Long Wheelbase

Model	Rated Hp	Wheelbase mm	Weight kg
T7.230	180	2884	8140
T7.245	200	2884	8140
T7.260	220	2884	8140
T7.270	240	2884	8140

T7 Heavy Duty

Model	Rated Hp	Wheelbase mm	Weight kg
T7.290	271	2995	10500
T7.315	300	2995	10500

T7 range: Ten models. Three transmissions. Countless awards.

The T7 standard wheelbase is part of the extended T7 family which means there is a New Holland T7 tractor to match all of your specific business needs. The T7 standard wheelbase extended family has rated powers spanning from 180 to 300 horsepower, the entire 10-model T7 model line-up offers a choice of semi-powershift, full-powershift or continuously variable transmissions (CVT), with the T7.225, T7.270, T7.290 and T7.315 only available with Auto Command™, CVT, transmissions.

Blue Power. Enjoy style, comfort and luxury at work.

Manufactured at the New Holland plant in Basildon, UK, the T7 Blue Power Auto Command™ T7.210 and T7.225 models offer exacting customers a premium agricultural experience, guaranteed by the very best of New Holland's style, technology, comfort and innovation.

- Distinctive and eye-catching metallic midnight blue paint
 - Chrome coloured grille
 - Silver wheel rims
 - Raised silver decals
 - Blue Power roof insignia
 - Blue Power branded seat and keyring
 - Personalised thick pile cab carpet
 - Silver detail on cab worklights
 - Plus a long list of standard equipment
- Blue Power. Exclusive edition, exclusive emotion.**

Please, take a seat.

New Holland brings to you the best-in-class seat offering, with three different models providing you with a wide and comprehensive choice. All seats benefit from improved cushioning. These firmer, more durable seat cushions provide outstanding comfort whatever the terrain. A standard, full-sized upholstered instructor seat folds down to provide a work surface when not in use.

Dynamic Comfort™ seat
The Dynamic Comfort seat boasts an enhanced low frequency suspension mechanism. The stitched cushions, finished in a stylish mixture of leather and cloth, also feature two stage heating.

Comfort seat
The standard Comfort seat uses a low frequency suspension unit. Cushions are finished in a durable dark blue cloth. All seat controls are easily identified ensuring seat adjustments are quick and easy.

Auto Comfort™ seat

The ventilated Auto Comfort seat offers a premier seating experience. With automatic weight setting, active suspension, heating and even ventilation system that cools and removes moisture, this is perfect for operators who spend extended hours in the tractor. Seat covering is in blue and grey leather

Both the Dynamic Comfort and Comfort seats benefit from innovative swivelling backrest, designed to provide upper back support and significantly increase comfort when the seat is turned to monitor rear mounted implements.

	Comfort seat	Dynamic Comfort™ seat	Auto Comfort™ seat	Blue Power Auto Comfort™ seat
Material	Cloth	Cloth/Leather	Leather	Cloth/Leather
Suspension type	Low frequency	Low frequency with dynamic damping	Semi active	Semi active

Climate system	-	2 stage heater	Heating and active ventilation	Heating and active ventilation
Backrest extension	Swivelling	Swivelling	Vertically adjustable	Vertically adjustable
Passenger seat	Cloth	Leather	Leather	Leather

Bright lights for dark nights.

Lighting up the way for improved night time productivity and total safety is a New Holland key priority, accomplished by bringing into the farming world the latest automotive sector innovations, such as LED lights. The all-new lighting offering features up to 20 LED lights. Brighter and less power-consuming than their standard equivalent, these lights offer a broad spread of white light, turning night into day. Up to six lights can be fitted in the front and rear of the roof, while high level headlamps light up the distance and pave the way for non-stop operation.

Fully adjustable lights

The optional 360° package includes an adjustable light at each corner of the cab. The rear lights are independently switched to reduce glare if working alongside a harvester.

LED lights are efficiency itself: more light, more durability, less power consumption.

The standard signature lights bring a modern stylish addition to the familiar New Holland hood lights, there's even a New Holland logo within the light unit.

Choose a lighting package to suit you

There are three cab lighting packages available, consisting of eight, 12 and 16 LED cab lights in various configurations, to suit your individual requirements.

At 69dB(A) the quietest cab around. and most spacious cab in its class.

Want all round visibility? Then New Holland's industry leading Horizon™ cab is the solution. In the yard, in the field or on the road, you have an uninterrupted view. Always. The single piece front screen offers a perfect view no matter what the weather or your field throws at you. The new sun visor protects you from the harshest rays. Working with front loaders? Select the high visibility, fully openable transparent roof hatch, which affords a perfect view at maximum extension from the comfort of your seat. Never lose a grain or suffer a crick in your neck ever again. Whisper quiet comfort is courtesy of a mere 69dB(A) cab noise level.

AT 69dB(A), T7 CABS ARE THE QUIETEST IN THE BUSINESS

Control centre

The air conditioning controls, lighting panel, additional storage slots and the radio have all been grouped in an ergonomic cluster. A Bluetooth handsfree/RDS/MP3 radio with AUX and USB connectivity is fitted as standard.

Eyes in the back of your head

The optional large heated wing mirrors feature an electronically adjustable top section for the best possible view of the road during high-speed transport. The adjustable lower section has been designed to effectively counteract blind spots.

Farming luxury

The full leather steering wheel and deep pile branded carpet are available as an option. You can select other luxury options such as leather seat, rear sunshade, tinted rear windscreen (standard on SideWinder™ II models) and heated front and rear windscreen.

An armrest to suit you

Range Command™ and Power Command™ tractors can be specified with the effective Classic armrest, featuring easy-to-operate and both logically and ergonomically positioned switches and controls.

SideWinder™ II: the ultimate ergonomic farming experience.

The T7 Auto Command™ tractors offer sophisticated features that are easy and intuitive to access. How? Well, we listened to customers and developed the SideWinder™ II armrest to make everything simpler. All key controls are accessed from the armrest. Throttle, transmission and hydraulics. Everything you need to control is intuitively selected. More advanced features can be quickly accessed. It does not take long to master a T7 tractor.

The button on the rear of the CommandGrip™ gives access to further functions.

The soft-touch buttons feature backlight technology to make selecting controls in the dark even easier.

Electronic SideWinder II adjustment

You can freely move the armrest to the position that suits you.

Fingertip control for up to two remote valves, which can both be configured with remote valve management.

Headland Turn Sequencing II (HTS II). Press to record, store and activate automated headland turn.

Optional IntelliSteer® auto-guidance, automated steering engagement.

Rear linkage raise/lower. Front linkage raise/lower (together with CommandGrip rear button).

Forward reverse shuttle switch.

Multifunction joystick. The joystick can be set to operate the front linkage, loader or remote valves.

Personalised positioning of the hydraulic joystick and rear linkage mouse available as a factory-fit option.

Rear linkage mouse. Lift heavy mounted implements with absolute precision.

Electronic remotes. Easy to reach paddles provide fingertip hydraulic operation. Flow and timing can be simply adjusted through the IntelliView™ touchscreen.

Ergonomically positioned hand throttle.

Full access to further advanced controls under the padded armrest.

Electronic SideWinder II adjustment.

Droop control. Select a lower limit for the engine for PTO tasks, or an upper threshold for the maximum engine speed.

Three guidance packages.

When ordering your T7, you can choose between three guidance packages. This means that your new T7 will arrive with the exact accuracy level you require. Choose your accuracy level right down to the most precise 1.5cm* option. A must for high value vegetable or bulb farming.

* Using RTK correction signal

Levels of accuracy and repeatability

New Holland offer multiple levels of accuracy. This enables you to select the right IntelliSteer® system to match your needs and budget. When using RTK correction with IntelliSteer you can enjoy guaranteed year on year repeatability.

NH 372 receivers

The NH 372 receiver is capable of working with OmniSTAR, RTX and RTK correction signals utilising both the GPS and GLONASS satellite constellations. For RTK applications an integrated radio receiver can be located inside the receiver, or a cellular modem can be used.

Advanced IntelliRate™ Control System

The T7 can be specified with the optional IntelliRate Control system. It is operated from the comfort of the cab and uses the IntelliView monitor to fine tune inputs and manage section and rate control of sprayers and seeding equipment. This prevents overlaps, controls dosing and seed rates depending on yield data and eliminates gaps; this will optimise inputs to maximise outputs.

IntelliView™ - visible intelligence

The ultra-widescreen 26.4cm IntelliView IV colour touchscreen monitor can be used to manage the optional IntelliSteer auto-guidance system. The IntelliView monitors enable fingertip programming of a variety of guidance paths, from straight A-B runs to the most complex adaptive curves. You can personalise your settings simply and easily and also transfer data using PLM Connect File Transfer and PLM desktop software packages.

Two way communication

The new T7 range is fitted with ISOBUS III technology. This means the tractor and implement can communicate with each other, relaying information back and forth, resulting in the implement controlling the speed of the tractor to achieve maximum productivity.

Telematics: manage your machine from the comfort of your office

PLM® Connect enables you to connect to your T7 from the comfort of your office through the utilisation of the mobile network. You can stay in touch with your machines at all times, and you can even send and receive real-time information that saves time and enhances productivity. The entry-level PLM Connect Essential package offers the most frequently used features or upgrade to the PLM Connect Professional package for full machine monitoring and control. In short, PLM Connect will help you to reduce your fuel bills and improve fleet management and security in one simple package.

Powered by FPT Industrial.

New Holland is not going it alone when it comes to Tier 4 technology. They can draw on the experience of their in-house engine development group: FPT Industrial.

Pioneers: Fiat invented Common Rail technology in the 1980s and brought it to the masses in 1997 on the Alfa Romeo 156. They were the very first to introduce it on agricultural machines on the TS-A tractor. Pioneering. Always.

Cleaner: For the fourth consecutive year, CNH Industrial has topped the Dow Jones Sustainability World and Europe indexes for the Industrial Engineering sector. Cleaner. Everywhere.

Proven: FPT Industrial has pioneered SCR technology since 1995 and has already produced over 450,000 SCR engines during the last eight years for the agricultural, construction and trucking industry. The award-winning HI-eSCR solution has been extensively tested and clinched the European Truck of Year 2013 award for the Iveco Stralis Hi-Way heavy duty on-road truck. Reliability. Confirmed.

Sustainable Efficient Technology

ECOBBlue™ Hi-eSCR explained

An evolution of the existing ECOBlue SCR system, you will benefit from the highest NO_x conversion efficiency in the industry. This multi-patented system uses a new Engine Control Unit, which not only manages the engine, but also the HI-eSCR after treatment system by controlling the supply and dosing modules. Using a dedicated closed loop system, it continuously monitors the NO_x levels in the exhaust gases, ensuring that during every cycle the precise amount of AdBlue is injected to achieve NO_x conversion of over 95%, all while guaranteeing low fluid consumption.

ECOBBlue

HI-eSCR

The power and efficiency you've come to expect from New Holland.

Your T7 tractor engines, which comply with the even more stringent Tier 4B emissions norms, offer you four key benefits:

Performance: more rated power up to 9%, on the T7.225 model, all whilst maintaining the transient response you've come to expect of the T7.

Efficient operation: the fluid consumption (diesel plus AdBlue®) will be the same or better than your Tier 4A T7. You will also benefit from reduced life-long operating costs.

Simplicity: the simpler engine installation ensures a higher power potential and the reduced cooling system delivers more efficient operation.

Consistency: there will be no change in vehicle operation.

The proof is in the numbers

The four model T7 range produces rated powers that span 140 - 180hp(CV) and with up to an additional 45hp(CV) on demand from EPM technology. Power-to-weight ratios as high as 26.4kg/hp reduce fuel bills and soil compaction to maintain productivity season after season.

Save fuel to reduce your carbon footprint

ECOBlue™ HI-eSCR technology for Tier 4B compliance reduces NOx emissions and maintains the T7 Series' impressive fuel efficiency, bringing about a substantial cut in your farm's carbon emissions. Visit www.carbonid.newholland.com to find out just how much carbon you could save!

Maintaining performance. Always.

Here at New Holland we're passionate about transient response. Put simply, as your NEF engine only breathes clean fresh air it can react even quicker when placed under load.

Engine Power Management explained

With EPM, the engine develops more power and torque according to the load on the transmission, hydraulics and PTO. On a T7.210 tractor, EPM will deliver up to 45 horsepower extra, but only when it is needed, to maintain performance.

- Rated hp: power produced at rated engine speed.
- Max hp: maximum power the engine can develop, in the working range.
- RatedEPMhp: power the engine can develop using EPM when conditions allow, at rated speed.
- Max EPM hp: maximum power the engine can develop using EPM when conditions allow, in the working range.

Push button simplicity. Years of proven technology.

Range Command is a simple, rugged and well proven transmission. It provides clutch-free gear changes within each working range. It is the ideal choice for general farm applications. Renowned for its legendary robustness and indisputable reliability. Power Command is a full-powershift transmission: you select the gear speed you want by simply pushing up or downshift buttons. In short, it's the most efficient full powershift available today.

Semi-Powershift or Full Powershift

Range Command and Power Command are based around the same gear offering. You can choose between a standard 40kph 18x6 or 28x12 creep speed transmission or opt for an extra high ratio 19x6 or 29x12 'direct drive' alternative. This can deliver either 40kph at a reduced engine speed for economy or a high 50kph transport speed. IntelliShift™ gear change management ensures a seamless powershift between each and every ratio delivering smooth changes all day long.

Armrest choice

Range Command and Power Command transmissions can be specified with either Classic or SideWinder™ II armrest. Make your choice depending on your driving and working habits. It will be the right one.

Everything under control

In Power Command models, you can select your desired gear speed by simply pushing up or downshift buttons. The left part of the screen always keeps you informed about the gear currently in operation.

Work together: automation, comfort and productivity

Auto Transport mode simplifies gear changing and reduces operator input during road work. It can even sense if the tractor is being pushed by a loaded trailer and holds the current gear to provide engine braking.

Auto Field manages both the engine speed and transmission to optimize performance and economy in PTO and draft applications.

Ergonomic and smart Powershuttle

You can even regulate the aggressiveness setting with an ergonomically positioned switch and change the setting whilst on the move. Thanks to the innovative memory shuttle system, your T7 will automatically shuttle between your chosen forward and reverse gears. The shuttle can be also programmed to automatically manage transmission shifts during a direction change. By engaging a dedicated position on the shuttle lever, you can activate the optional park brake to secure the tractor when neutral is selected.

Innovative Auto Command transmission offers advanced New Holland features.

Designed and built by New Holland over 25,000 multi award-winning Auto Command continuously variable transmissions (CVT) have been built. The Auto Command transmission benefits from multiple direct drive points with 100% mechanical efficiency. These points have been precision engineered to ensure that they perfectly match the most frequently used speeds during heavy draft work, secondary cultivation activities, high speed in-field work, such as baling or mowing, and high speed transport activities. Advanced double clutch control further enhances efficiency. Quite simply, it is the smoothest and most productive CVT around.

Force based movement enables the operator to change speed and direction. On the ICP there is a switch to alter the response of the speed change. Forward speed can also be controlled using the foot pedal.

Target speed adjustment – set a target speed to match your exact needs. Perfect when moving between fields or when crop yields have altered.

Target speed selection – allows you to change between three target speeds.

Four driving modes to suit your driving style

Auto mode. Once the desired target speed is achieved, Auto Command will match the engine and transmission to maintain it.

Cruise mode. Cruise mode allows the operator to achieve a set target speed at the touch of a button, and to maintain the speed for economy and productivity.

Manual mode. Allows the operator to manually set the required engine and forward speed, independently of each other.

PTO mode. As soon as the PTO is engaged, Auto Command will operate to achieve a constant engine speed.

Three adjustable target speeds for every need

Auto Command technology allows the operator to set a target speed of between 20m/hr right through to 50km/hr and regulate it to the nearest 0.01kph. No steps. No range changes.

Making the most of available torque

New Holland has developed its Auto Command transmissions so they can exploit the low running speed, high torque New Holland engines. With 50kph ECO, the engine can run as low as 1700rpm, significantly reducing fuel consumption.

Active StopStart

A key safety feature of Auto Command is Active StopStart. When the tractor is brought to a standstill, the transmission prevents the tractor moving backwards or forwards. Even with a heavy load. When the transmission takes up drive there is no risk of roll back on steep inclines.

Balancing fuel economy and productivity

When working in Auto and Cruise modes, use the droop control dial, situated to the right of the operator, to limit upper engine speed used to achieve the desired forward speed. The result: you reach target speed at much lower engine revs, saving you fuel. In PTO mode, use droop control to regulate the acceptable reduction in PTO speed before forward speed is reduced.

Improved stability. Faster travel. Better comfort. Greater performance.

Combining the powerful action of Terraglide™ front axle suspension, Comfort Ride™ cab suspension and suspended seat, you can experience a smooth ride, whatever the road or soil conditions, with great benefit in terms of comfort, driving pleasure and reduced fatigue.

Comfort Ride cab suspension and suspended seat

The automatic two-stage Comfort Ride cab suspension system provides proven operator comfort. It's designed to complement the cushioned ride offered by the standard air-suspension seat to reduce fatigue.

Terraglide front axle

The Terraglide front axle suspension is another New Holland innovation that smoothes your ride and increases control. It is recommended for operations that include fast field work and extended transport duties. The Terraglide system, with new dual accumulators and integral hub braking, is standard on tractors specified with a 50kph transmission.

Anti-jack-knifing technology

T7 Auto Command™ models feature technology to counteract jack-knifing, further enhancing safety. When decelerating on a low friction surface, the operator can push the forward shuttle button on the CommandGrip™ handle, locking the transmission. The tractor is then slowed using the brakes only, ensuring that the trailer is also decelerated.

Exhaust brake option

Ideal for intensive transport applications, exhaust braking is available across the entire T7 range.

Advanced traction management

Terralock manages drive to the front axle and engage and release the differential locks automatically. During a headland turn or moving from work to transport, Terralock will unlock the differentials and four wheel drive without operator intervention.

Features to boost your productivity.

Double your productivity with front linkage and PTO. Consume less fuel in less demanding operations with Eco PTO speed. Save time and effort at the headlands with the Headland Turn Sequencing II system: it can record and replay at the simple touch of a button, up to 28 repetitive headland turn operations. And all you have to do is push the button, turn the wheel and drive.

Headland Turn Sequencing II: Hassle Free Repeatability

Repeat after me: the Headland Turn Sequencing II system is simplicity itself. You can easily program it via the touchscreen monitor, either recording the current headland turn sequence or by inserting new commands from the menu in order to change pre-recorded sequences or to create new ones.

Rear linkage: strong, efficient and powerful

The rear linkage and hydraulics are designed to work with heavy mounted equipment over extended periods and dynamic ride control shock load protection reduces bounce. Fender mounted controls assist when hitching implements. The maximum lift capacity is a massive 8,257kg.

The perfect fit: front linkage and PTO

The optional, fully integrated, factory fitted front linkage and PTO feature a front management system to prevent PTO damage and a fast raise/lower when speed is of the essence.

Advanced pto operation

Auto PTO can be selected to automatically disengage the PTO as the front or rear linkage is raised above a pre-set position. This protects the PTO shaft and tractor. Speed selection is via a mechanical lever. Three speeds are available.

Hydraulic power to meet your demands.

Hydraulic efficiency is pivotal for the overall performance of the tractor, that's why T7 tractors feature closed centre load sensing hydraulics and all models are fitted with a 113, 140 or 160 litres per minute hydraulic pump. Five rear and three mid mount valves are available, while an ISO power beyond slice can be added where an implement is able to control the oil flow. On the Classic models configurable mechanical remote valves provide the conveniences usually associated with electronic versions and on any T7 you'll know that the variable displacement pump only works on demand, thus reducing fuel consumption.

Electronic or mechanical - you decide

The Classic armrest incorporates mechanical controls for the remote valves. SiderWinder™ II armrest models have electronic controls, with two controls on the CommandGrip™ handle for ease of use. A hydraulic control joystick can be specified. This can be set to operate front or rear valves.

Control up to eight remotes

Available on SideWinder II tractors, the optional remote valve management system enables the operator to choose which hydraulic remote is operated by the CommandGrip hydraulic control button and which via the armrest paddles. The hydraulic flow and timing for each valve can be simply and individually adjusted via the IntelliView™ touchscreen. All Classic armrest models feature four deluxe mechanical rear remote valves. All T7 standard wheelbase models offer three mid-mount valves.

360°: T7.

The new T7 range has been designed to spend more time working and less time in the yard. All service points are easy to access, and super long service intervals mean they will spend more time in their working environment.

Engine oil check and fill points are easy to reach, with no need to lift the hood. This makes routine checks faster and servicing simpler. You will also still be able to enjoy the long 600 hour service intervals that you've come to expect of New Holland.

Will I be able to find AdBlue® easily?

The answer is yes! It will be available through CNH Industrial Parts & Service. AdBlue can even be delivered direct to your farm for absolute convenience.

Dealer Installed Accessories

A comprehensive range of approved accessories to optimise machine performance, supplied and fitted by your dealer.

New Holland Services.

Finance tailored to your business

New Holland Blue Leaf Finance is well established and respected within the agricultural sector. Advice and finance packages tailored to your specific needs are available. With Blue Leaf Finance, you have the peace of mind that comes from dealing with a financing company that specialises in agriculture.

Service plus - long lasting confidence

Service Plus coverage provides owners of New Holland agricultural machinery with additional cover on the expiry of the manufacturer's contractual warranty. Please ask your dealer for more details.

Trained to give you the best support

Your dedicated New Holland dealer technicians receive regular training updates. These are carried out both through on-line courses as well as intensive classroom sessions. This advanced approach ensures your dealer will always have the skills needed to look after the latest and most advanced New Holland products.

B Minimum width (mm)		2446	2446	2446
C Height at centre of rear axle to top of cab (mm)		2215	2215	2215
D Overall height (mm)		3040	3090	3140
E Wheelbase Standard axle (mm)		2734	2734	2734
Terraglide™ suspended axle (mm)		2789	2789	2789
SuperSteer™ axle (mm)		2880	2880	2880
F Track width (min. / max.) (mm)		1630 / 2234	1734 / 2234	1734 / 2234
G Ground clearance (depends on hitch or tow hook) (mm)		515	540	565

**** Rear tyres other than those mentioned are available: depending on model, 600/65R38, 580/70R38, 620/70R42, 650/75R38, 710/60R38, 710/70R38, 18.4R38, 20.8R38, 18.4R42, 20.8R42 and 580/70R42

New Holland Top Service: Customer Support and Customer Information

Top Availability

Please contact your local dealer if you need more information.

Top Speed

Express parts delivery: when you need it, where you need it!

Top Priority

Fast-track solution during the season: because your harvest can't wait!

Top Satisfaction

We drive and track the solution you need, keeping you informed: until you are 100% satisfied!
