TH RANGE
TH6.32 | TH6.36 | TH7.32
TH7.37 | TH7.42 | TH9.35
New TH range, as good as gold.

For over 20 years New Holland telehandlers have continued to deliver an unrivalled mix of performance, dependability and affordability. The new TH series machines benefit from a striking new yellow and grey livery, reflecting their importance to the hay and forage sector and association with those product lines. A wider six model range, consisting of TH6.32, TH6.36, TH7.32, TH7.37, TH7.42 and TH9.35 models from six to nine meters, is packaged within fourteen model versions, divided into S, Classic, Plus and Elite variants, to cater for the different performance needs of our customers.

The new TH models feature all new 4x3 and 6x3 PowerShift™ transmissions, providing smoother shifting and shuttling performance resulting in a better driving experience. Compliant to Tier 4B emissions standards, enhanced performance and economy are matched to improved comfort and reduced operating costs. The very latest cab sets a benchmark for low noise and comfort.
In response to customer demand and the need to maximize productivity, the new TH product offering has been expanded to six models with a total of fourteen variants, with three models within the important 7m category. *Elite* models feature 146hp engines, 3 mode 6x3 PowerShift™ transmissions, piston pump and a seat mounted joystick, *Plus* models feature 133hp engines and 6x3 PowerShift™ transmissions with 2 modes and a piston pump. *Classic* spec variants feature 133hp engines, reversible cooling fan, single mode 4x3 PowerShift™ transmission and limited slip rear diff. The *S* models are suitable for the more price conscious operators who require only the eSsential spec on their machine to get the job done and features a 133hp engine, gear pump and single mode 4x3 PowerShift™ transmission. The new TH range is the product of years of development, investment and listening to customer feedback.

**Superior visibility and comfort**

The new TH range features an advanced cab design that offers improved comfort, noise suppression and visibility for maximum productivity at any time. The new LED light option can produce up to 25,000 lumens of combined lighting power to turn night into day and increase safety and productivity.

**Enhanced quality**

The TH telehandlers feature a twin U shaped robot welded boom, that is extremely rigid and durable. The H shaped ladder chassis has massive torsional strength and is engineered to operate in the most demanding applications. New Holland is committed to ongoing quality improvement and has invested in a new dedicated TH production line between 2012 and 2013.

**Ease of ownership**

Downtime is the enemy of productivity, that is why all TH telehandlers are engineered to minimise the need for routine maintenance for optimised dependability. Daily checks and routine care has been simplified, making it easier to look after the handler between its extended 600-hour service intervals.
Industrial or Agricultural tyre options

New 6x3 & 4x3 PowerShift™ transmissions

Optional complete auto lubrication system

Hydraulic quick-coupler option

360° vision, 71dB(A) noise levels

External Aux pressure relief switch

3.2 - 4.2 ton lift capacity

Up to 10 LED lights

Best in class service access

Industrial or Agricultural tyre options
Six TH models, countless applications.

At New Holland, we listen to our customers. We appreciate key telehandler demands vary between those seeking a telehandler with the reach to pick up, transport and stack large bales to those who need a maneuverable machine that will see daily use for livestock duties – and everything in between. With the TH series, New Holland has a telehandler to suit specific demands. As a guide, each model number gives a broad indication of its maximum lift height and capacity. As an example, TH6.32 models will lift to 6.10m and offer a 3,200kg capacity, the TH9.35 operating up to 9.10m and offering 3,500kg capacity.
New Holland offers more budget focused operators a wide choice of models across the TH range, both S and Classic models represent value for money without compromising productivity. All S and Classic models feature Tier 4B, 4.5 litre NEF engines, with a maximum power output of 133hp. These telehandlers have new 4F-3R PowerShift™ transmissions with gears selectable on the joystick, while direction changes are handled by a column mounted powershuttle lever. A 120 L/min hydraulic gear pump is available on S models while Classic models feature a 140 L/min variable displacement pump and manual three-mode steering system add to the high levels of equipment offered on both variants.

**S models features include:**
- open rear differential & LSD front axle
- 128° dump angle
- mechanical coupler
- mechanical seat
- 34kph max speed

**Classic models additional features include:**
- limited slip diffs front and rear
- reversible cooling fan
- 142° dump angle
- 140lpm variable pump

Designed for applications to include materials handling, yard work and stacking large bales, these affordable telehandlers are the ideal choice for arable, mixed farm and contract applications. A choice of rear trailer hitch types and hydraulic brake coupling, dependant upon market, are available.

### Plus and Elite models

*Plus and Elite models are aimed at the most demanding operators who require maximum productivity and comfort at all times. These machines produce maximum power outputs of 133hp and 146hp respectively from a Tier 4B, 4.5 litre NEF engine and both feature new 6F-3R PowerShift™ transmissions. The transmission offering features two modes on Plus models, Manual and Semi-auto, Elite models feature three transmission modes, Manual, Semi-auto and Full-auto. The transmission modes make Plus and especially Elite models well suited to transport work and towing capacity with a braked trailer is a massive 20tons. On Elite models, the forward and reverse powershuttle can be selected via buttons on the main joystick or via an optional steering column mounted lever.*

**Plus models features also include:**
- 133hp Tier 4B engine
- air suspended seat
- HVAC ventilation system
- hydraulic quick coupler
- rear cab light pack
- telescopic steering column

**Elite models additional features include:**
- 146hp Tier4B engine
- hydraulic pressure release
- armrest mounted joystick
- rear cab and boom light pack
- heated air suspended seat
- automatic steering alignment
- rear electrical sockets
- 40kph max speed

These combined features make Plus & Elite telehandlers the default choice for demanding farm and contract operators, their high power to weight ratio enabling them to deliver exceptional performance in the most demanding applications.
See more for better productivity.

New Holland has taken its established expertise in tractor cab design and applied it to the 360° Vision Cab. Offering class-leading space and comfort, the cab affords excellent all-round visibility with an unparalleled view of the front of the carriage/forks when fully lowered. In work, this extra visibility boosts productivity in duties to include loader work and speeds up attachment changeovers.

More glass, brilliant visibility

Extensive research by New Holland has lead to the development of the 360° Vision Cab. A key aim was to help reduce ‘blind spots’ over the front of the boom, particularly when fully raised and fully lowered. By combining a wide and deep front screen with slim ‘A’ pillars, the visibility from the operators seat is greatly enhanced.

Engineered for low noise

The best way to reduce noise is to eliminate its sources. By combining a number of design developments, TH in-cab noise levels are just 71dB(A). A key to the low noise levels is the ECOBlue™ Hi-eSCR equipped engines, these clean running power units also offering exceptionally low bystander noise levels.
New LED lights
- Powerful LED lighting package can now be specified as an option
- Each LED light outputs 2500 lumen
- A total of 10 LED lights give all round visibility for enhanced safety and productivity
- Up to 5 front facing, 3 rear facing and 2 side facing LED lights can be fitted

Eight vents for comfort
- Powerful air-conditioning system ensures day long comfort
- Eight adjustable louvers direct warm or cool air to where its needed
- The cab also features opening rear and door windows for fresh air entry

Cab and controls
- TH Elite models feature an electronic joystick mounted on the seat armrest
- Gear selection, neutral, forward/reverse shuttle, transmission de-clutch, boom and 3rd service functions can be operated from the joystick
- A steering column mounted shuttle lever is also optional on Elite models
- Steering wheel adjusts for both tilt and reach
- The heated air suspended seat is standard

- Non-Elite TH models feature a console mounted electronic joystick
- Transmission de-clutch & gear selection in addition to boom and 3rd service functions, can be operated from the joystick
- A forward/reverse shuttle lever is mounted on the steering column
- Steering column features tilt adjustment on S and Classic; Plus also features height adjustment
- A pneumatic suspended seat is optional on S and Classic but is default spec on Plus models. For all models the air suspended seat can be upgraded with a heating function
Clean performance. Responsive productivity.

TH telehandlers are powered by Tier 4B compliant, NEF 4.5litre, four-cylinder engines, manufactured in house by FPT Industrial. Proven in the New Holland T6 tractor models, these exceptionally clean running engines employ ECOBlue™ HI-eSCR technology, have a long 600 hour service interval and a proven economy and dependability record. Rated power outputs are 121hp for the non-
*Elite* models and 131hp for the TH *Elite*. These figures climb to 133hp and 146hp as engine speed drops to 1,800rpm. To minimise power loss, the engine flywheel connects directly to the transmission via a heavy-duty 280mm torque convertor, a transfer box directing power to the front and rear axles. TH *Elite* models achieve a maximum 40km/hr transport speed, and both *Elite* and non-*Elite* models feature a transport mode that, when manually activated, automatically locks the boom functions. Transport mode also prevents the operator from activating 4WS or crab steer modes, permitting front axle steering only.

### Reversing fans keep everything cool
- Main engine radiator fan reverses every 6 minutes and runs for 15 seconds
- Dust and debris are blown from the engine cooling package, oil coolers and intercooler
- The same cycle is repeated by two electrical fans to clean air-con, fuel cooler and transmission radiators

### Bigger tyres, more choice
- TH telehandlers are fitted with 460/70R24 tyres
- Wider 500/70R24 option can be specified
- Ground clearance at the lowest point under the axles is a generous 415mm
- Industrial and Hybrid tyre option are now available in 460 and 500mm sizes
New TH 4x3 transmission keeps it simple
• Both S & Classic models feature a full powershift 4F x 3R transmission
• Gear changes are made via buttons on the console mounted joystick
• New gear ratios result in greatly improved performance when climbing gradients and towing in higher transport gears
• Smooth direction changes are made via the steering column mounted shuttle lever
• Noticeably smoother shifting and acceleration are a result of the new transmission
• Single, manual transmission mode keeps things simple

TH Plus & Elite 6x3 transmission features auto modes
• Plus models feature a new 6F x 3R PowerShift™ transmission with 2 modes, Manual and Semi-auto
• Semi-auto mode is effective in gears 4, 5 and 6 and is ideal for transport duties
• When activated it selects the gear most appropriate to the forward speed and engine rpm
• Towing capacity with a braked trailer is 20tons
• Elite models feature the new 6x3 transmission with 3 modes, Manual, Semi-auto and Full-auto
• Full-auto mode is active between gears 2 - 6 for great roading performances; Semi-auto mode operates between gears 2 - 4 to maximize productivity in yards and tight spaces
• Memory shuttle on Elite models remembers the last used forward and reverse gears when changing direction

Full time 4WD and auto traction control
• All TH models feature full time 4WD as standard
• Front limited slip differential is also standard on all models
• Rear LSD available on Classic, Plus and Elite models
• The differential directs up to 45% of available torque across the axle to ensure the wheel with the greatest traction always gets power

Hydraulic wet disc brakes
• Sealed wet disc brakes on both TH axles require minimal maintenance and can handle high transport speeds
• The hydraulic trailer brake circuit is linked to the TH’s brakes to enhance safety
• The parking brake* is automatically activated at any time the engine is switched off; it can be manually engaged by shuttle lever on steering column or via a dash mounted switch
* SAHR system (Spring Applied Hydraulic Release)

Manoeuvrability and steering modes
• Turning radius when 4WS is engaged is just 3.9m
• Transport mode permits the selection of 2WS only
• TH Elite models offer auto wheel alignment when switching between, all-wheel, crab and front steering; this feature is available as option for Classic and Plus models
Powerful hydraulics deliver fast work cycles.

Efficient hydraulics are key to telehandler productivity. This goes beyond pump capacity; efficient use of available oil, optimised ram sizes and effective control valves all making a contribution to overall performance. The new TH models benefit from New Holland’s 20 years of telehandler development, careful attention to the design of the hydraulic circuit not just improving cycle times but also in ensuring performance is maintained in demanding conditions to include extreme heat. Up to two optional front auxiliary hydraulic outlets, complete with valves and diverters, to control front mounted attachments can be specified. Additional rear auxiliary lines are also available.

Hydraulic pump choice to tailor your needs

- **S models** are fitted with 120 L/min gear pump
- The joystick delivers full proportional control and enables multiple functions to be performed simultaneously

Variable pump delivers high output at low engine speeds

- **TH Classic, Plus and Elite** models are fitted with a high performance, variable displacement piston pump with a maximum output of 140 L/min
- Guaranteed to deliver high flow rates at all engine speeds but to also close down when there is no demand on the system
- This allows more engine power to be diverted to the transmission and is of particular value in duties to include transport and when climbing a silage clamp

External pressure release switch

- Switch attachments over quickly and easily without returning to the cab by pressing the Aux pressure relief switch located above the front fender
New Holland employs state-of-the-art manufacturing techniques and has invested millions in the production line for TH models. Robot welding is a key manufacturing process and ensures consistent quality during chassis and boom construction.

Strength by design.

- Hydraulic end-stroke dampers ensure smooth boom retraction and extension
- Dampers also protect the boom and operator from regular shock loads
- Engineered 40/60 weight distribution eliminates the need for bolt-on counterweights
- Excellent stability and traction is achieved when loaded
- Chassis strength is boosted as a result of the in-built mass
- 45° low profile headstock design enables complete filling of roof cavities
- 128° tilt angle on S models, 142° is default on Classic, Plus and Elite
- Manual or hydraulic attachment lock is available
**Boom construction**
- Twin U-shaped sections, 10mm - 12mm thick form the boom
- Heavy duty pins ensure optimum durability
- Boom wear pads are easy to adjust
- Boom brushes prevent debris entering the sliding sections

**Lifting geometry**
- Main lift ram is positioned under the boom
- Boom compensation cylinder faces rearward near the hinge point
- Both cylinders extend in opposite directions as the boom is raised
- This “opposite working” design improves boom control

**Boom suspension**
- Optional boom suspension reduces shock loads over rough terrain
- Automatic deactivation occurs when the boom exceeds a 35° lift angle

**Chassis construction**
- H-shape ladder chassis is made from 25mm high tensile steel
- Robot welding ensures exceptional torsional rigidity
- Exceptionally strong boom support negates the need to add extra counterweights
360°: TH.

New Holland has worked hard to reduce the maintenance demands of its new TH telehandlers.

- Adjusting the telescopic boom pads has been simplified, a simple nut screw and lock nut system making adjustment quick and easy.
- 140 litre fuel tank features a wide filler neck and is easy to access.
- 27 litre capacity AdBlue tank is conveniently located next to the diesel tank for simultaneous refilling.
- S models, feature just nine daily grease points on headstock.
- Classic, Plus and Elite models feature 12 daily grease points.
- Grouped grease nipples are optional to grease the axles, lift and compensation cylinders.

Auto lubrication system
- New auto-lube system ensures that all important lubrication points receive the right amount of grease at the right time.
- Manual activation is possible from the cab.
- Headstock grease points are serviced by a separate dispenser unit.
- An additional dispenser unit is fitted to the extra boom section on 9m models.

- The engine air filter is easy to check, clean or replace, without the need for tools.
- The compact cooling package is mounted on a frame that enables the radiators to both swing out and tilt for easy cleaning.
- The engine hood lifts on gas struts for full access.
New Holland Services.

Finance tailored to your business
CNH Industrial Capital, the financial services company of New Holland, is well established and respected within the agricultural sector. Advice and finance packages tailored to your specific needs are available. With CNH Industrial Capital, you have the peace of mind that comes from dealing with a financing company that specialises in agriculture.

Trained to give you the best support
Your dedicated New Holland dealer technicians receive regular training updates. These are carried out both through on-line courses as well as intensive classroom sessions. This advanced approach ensures your dealer will always have the skills needed to look after the latest and most advanced New Holland products.

Service Plus – because your peace of mind is priceless
Service Plus programme provides owners of New Holland agricultural machinery with repair services covering your machinery over the Manufacturer’s contractual Warranty. Maximum control over operating costs, repairs completed by authorized NH Dealers using NH genuine parts, higher re-sale value of your machine, transferable coverage. You can choose from three levels of coverage:

- **Silver Cover - Powertrain**
  - The number of years of the cover: two, three, four or five years
  - The number of hours of use (or number of bales for balers)
  - Many other options to tailor the programme and meet your expectations

- **Gold Cover - Extended**

- **Platinum Cover - Full Repair**

Please refer to your Dealer how to take out a Service Plus contract for your machinery.

## Models

|---------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|

### Engine
- **Engine Type:** NEF N45
- **Compliance with engine emissions regulations:** Tier 4B / Stage IV
- **Displacement:** 4500 cm³
- **No. of cylinders / Valves:** 4 / 4
- **Aspiration:** Turbo Intercooler
- **Fuel system:** High Pressure Common Rail
- **Rated power - ISO 14396 - ECE R120 [kW/hp(CV)]**
  - **TH6.36 Plus:** 89 / 121 @2200rpm
  - **TH7.32 Plus:** 98 / 133 @1800rpm
  - **TH7.37 Plus:** 96 / 131 @2200rpm
  - **TH7.42 Plus:** 107 / 146 @1800rpm
  - **TH9.35 Plus:** 99 / 131 @2200rpm
- **Max torque - ISO 14396 - ECE R120 (Nm)**
  - **TH6.36 Plus:** 549 @1500rpm
  - **TH7.32 Plus:** 591 @1400rpm
  - **TH7.37 Plus:** 591 @1400rpm
  - **TH7.42 Plus:** 591 @1400rpm
  - **TH9.35 Plus:** 591 @1400rpm

### Transmission
- **Traction:** 4WD
- **Type of transmission:** PowerShift™
- **Number of gears:** [Full]
- **Gear shifting modes:** Manual, Semi-Auto
- **Shifting control:** Lever on steering column
- **Max speed (kph):** 34

### Brakes
- **Service brake actuation:** Hydraulic power assisted
- **Service brake type:** Oil immersed discs
- **Discs per axle:** [front] / [rear]
- **Parking brake:** SAHR (Spring Applied Hydraulic Release) integrated in Front Axle

### Axles and differentials
- **Front axle type:** Limited Slip differential
- **Rear axle type:** Limited Slip differential

### Steering
- **Actuation:** Power steering
- **Operating modes:** 2WS, 4WS, Crab
- **Manual wheel alignment with visual indicators:**
- **Automatic wheel alignment:**
- **Max speed (kph):** 34

### Tyres
- **Size:** 440/70R24 - 500/70R24
- **Pattern type:** Agriculture, Industrial, Hybrid

### Hydraulics
- **Variable flow pump:** 140lpm / 240bar
- **Front auxiliary flow (lpm):** 130
- **Rear auxiliary flow (lpm):** 140
- **Boom control:** Pilot Electro-Proportional
- **Boom extension control:** Electro-Proportional
- **Cyl. time - Lift / Lower (seconds):** 6.7 / 5.2
- **Cyl. time - Extend / Retract (seconds):** 5.2 / 3.7
- **Cyl. time - Dump / Crowd (seconds):** 2.8 / 2.9

### Electrical
- **Battery:** 12V - 180Ah - 1000A
- **Alternator (Amps):** 120

### Cab
- **Structure:** ROPS - ISO 3471 / FOPS - ISO 3449
- **Cab noise level - LpA - ISO 14396 - ECE R120 (dB(A)):**
- **Air conditioning:**
- **Air suspension seat:**
- **Joystick mount:** Console mounted
- **Steering column:** Tilting and telescopic

### Capacities
- **Fuel tank (Litres):** 140
- **AdBlue tank (Litres):** 27
- **Engine oil (Litres):** 12
- ** Hydraulic oil tank (Litres):** 105

New Holland Top Service:
customer support and customer information.

Top Availability
If you need information, or have an out of hours question, ring our toll-free number*. All day, every day, we are just a call away.

Top Speed
Express parts delivery: when you need it, where you need it!

Top Priority
Fast-track solution during the season: because your harvest can’t wait!

Top Satisfaction
We drive and track the solution you need, keeping you informed: until you are 100% satisfied!

* Calls to the Top Service team are free from landlines in the United Kingdom and Republic of Ireland. UK-based mobile calls are also free, but Republic of Ireland mobile users should call 01 2421881 and this will be charged at your standard network rate.

For more details, ask your New Holland dealer!
