TRACTORS /

TT SERIES

TT.55 | TT.65 | TT.75

TT.55F | TT.65F | TT.75F NARROW

**PERFECT FOR
YOUR FIELD,
AS BIG AS
YOUR NEEDS.**

THE BEST FOR YOU

New Holland has a great passion: finding the best solutions for you. No matter the size of the field, we work to deliver machines that will be a great partner for your business, whatever that may be.

This is how it is with TT tractors. They are designed to meet the most specific needs in the field. They are ideal for small and medium-sized producers, as they have power, low fuel consumption and agility, especially in end-of-line maneuvers, since they have a short turning radius.

With affordable price, reduced operational cost and, because they are very economical, the TT and TTF lines provide ease of operations and the brand's commitment to offer the best for you.

YOU DEMAND EFFICIENCY. IT GIVES YOU.

**WITH 3-CYLINDER FPT S8000 TIER 3 MAR I ENGINES
AND TORQUE RESERVES OF UP TO 27%, THE TT AND TTF
TRACTORS PROVIDE LOWER FUEL CONSUMPTION
AND LONGER TIME WITHOUT GEAR CHANGES.**

These engines are equipped with rotary injection pumps, which ensure proper fuel burn and further increase efficiency. The TT and TTF models also have an independent power take-off, of 540

rpm with mechanical actuation, ensuring greater operational efficiency and a partially synchronized transmission, for better gear scaling. Easy to operate, tasks are made simple with great performance.

TIER 3 MAR I engine with
up to 27% torque reserve.
Low consumption and
fewer gear changes.

Independent
540-rpm power take-off
with mechanical actuation.
Greater fuel economy.

Partially synchronized
transmission, with optional
Creeper, the best gear
scaling available
in the TTF line.

One-piece, self-locking
front axle with steel-plated
crossheads. Lower
maintenance cost.
Ideal for any operation.

THE UNION OF ROBUSTNESS AND VERSATILITY

World-renowned
for their robustness and versatility,
the FPT S8000 TIER 3 MAR I
provide longer operating lifespan
and and less maintenance.
Agile and powerful, the TT and TTF
lines have arrived to work on several

fronts in your fields. Ideal for those
activities that require power, the
one-piece front axle assembly and
and steel-plated crossheads deliver
greater durability, safety and
have no leakage points,
securing all operations.

QUICK MAINTENANCE SO, YOU WON'T STOP!

For New Holland, a tractor is made to work. That's why maintenance is simple and fast. All inspections and routine maintenance are done with the operator at ground level. The easy to open hood allows access to the main components. Less downtime, better use of the tractor, and higher productivity.

Quick and easy access to the main components.

MODERN TECHNOLOGY IN THE HYDRAULIC SYSTEM

The independent 41 L/min. flow gear pump and two remote-controlled, open-center valves provide a greater variety of attachments options for performing work with TT and TTF lines' tractors. All

the models are equipped with the Lift-O-Matic™, system, which mechanically memorizes the position of the lift arms, resulting in greater work uniformity, at the touch of a button.

Lift-O-Matic™ for greater uniformity and speed in hydraulic operations.

Hydraulic system with 41 L/min of flow, allows a greater variety of attachments.

CAB EVOLUTION

The TT.55F, TT.65F and TT.75F models are now equipped with the new *Evolution* cab, which offers more comfort, ergonomics and safety.

IN ADDITION, IMPORTANT POINTS PROVIDE THE OPERATOR WITH TRANQUILITY IN DRIVING THE TTF, SUCH AS:

- Air-conditioning with different cooling speeds
- Adjustable operator's seat
- Repositioning of the control levers to make operations easier
- Internal trimming with *Touch* automotive system
- Customized stowage compartments
- Entire access door, no center column; easier entry and exit
- Maintenance points with easy access such as inspection windows
- Roll-over certificate ROPS.

All so you have the perfect set during field operations.

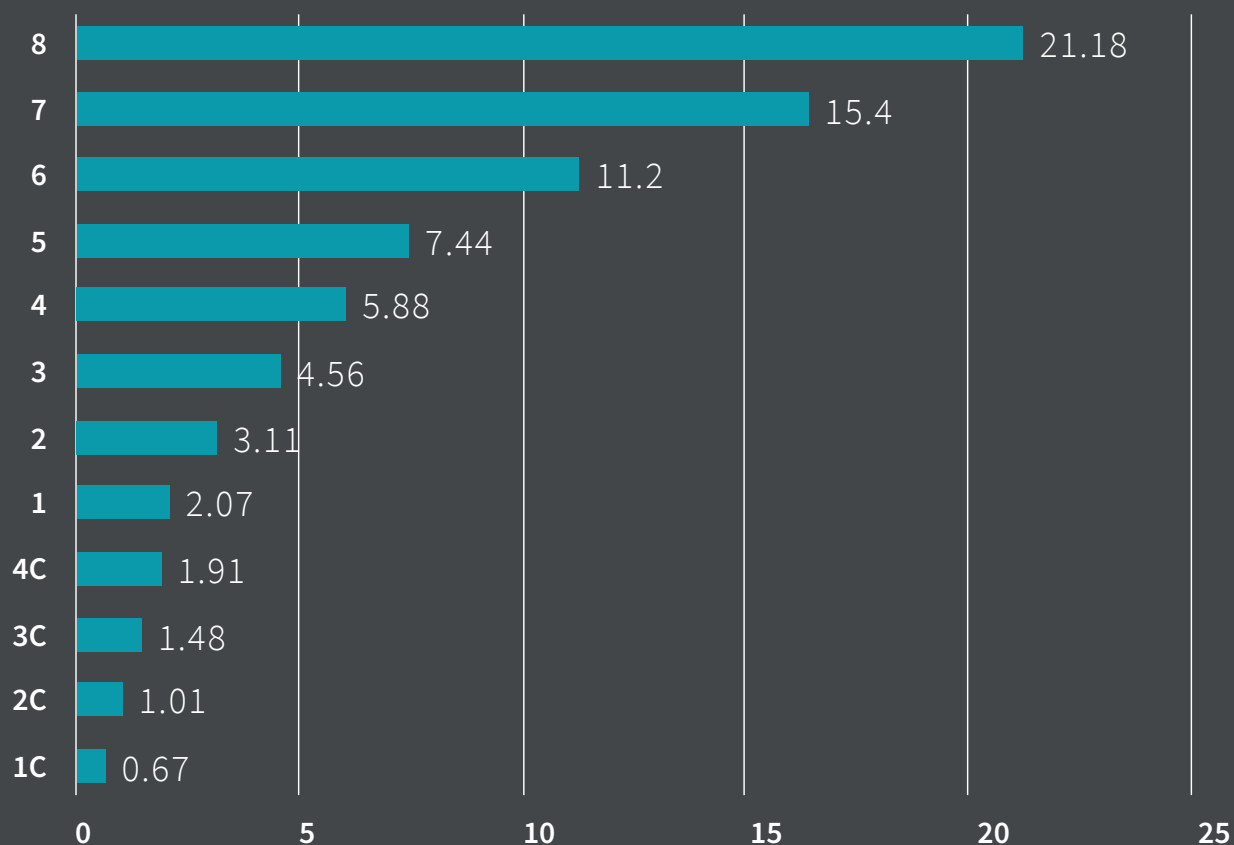

CREEPER

TT.65F AND TT.75F

The TT.65F and TT.75F models with 12x3 transmission and Creeper are prepared for any type of operation, the right speed in field operations.

TT.65F E TT.75F CREEPER SPEED TABLE

(km/h) @ 1.900 rpm - Rear tire 14.9-24

NEW HOLLAND

THE BEST STRUCTURED DEALER NETWORK IN BRAZIL

With a dealer network spread throughout the country, New Holland offers a service network with factory-trained professionals and genuine parts for the best machine performance and the highest productivity for the farmer.
