Safety begins with a thorough understanding of the equipment that’s built by farmers, sold by farmers and used by farmers. You might call that instinct, but we call it fieldSMART™.

Support at every step. When you place your confidence in New Holland agricultural equipment, you get the finest in local support. Your New Holland dealer understands the many challenges you face and stands behind you at every step with the equipment, parts, service and financial solutions to make your job easier. Look to New Holland for a complete selection of equipment, including a full line of tractors, hay & forage equipment, harvesting, crop production and material handling equipment.

Quality parts and service. Turn to your New Holland dealer after the sale for expert, factory-trained service and genuine New Holland-branded parts. Your dealer has the very latest service updates and training to ensure your equipment keeps working productively season after season.

Financing solutions. Your New Holland dealer can tell you about smart ways to turn your financial challenges into opportunities with a portfolio of innovative financial services available through CNH Industrial Capital, including customized financing, leasing, insurance and the purchasing convenience of a Commercial Revolving Account.

For reliable equipment, parts and service – or just honest advice on farming and finance – turn to New Holland and your trusted New Holland dealer. We know. We’re farmers, too.
PURE POWER AND ULTIMATE EFFICIENCY FOR MIXED FARMERS

When it comes to a mixed farmer’s tractor, New Holland understands that no two tasks are truly alike. With this knowledge, T6 tractors were designed to master multiple jobs from haymaking to row crop applications.

MAXIMUM VERSATILITY

Productivity comes standard thanks to an endless list of options including the choice between either a four-cylinder or six-cylinder engine, as well as the transmission options including a semi-powershift Electro Command™ transmission or Auto Command™ CVT transmission.

POWER AND PRODUCTIVITY

You’ll benefit from ECOBlue™ SCR Technology that’s used for Tier 4A compliancy. Your NEF engine breathes only cool, clean, fresh air for ultimate combustion efficiency and performance. You get a more responsive engine as a result of the enormous 42% torque rise. Engine Power Management (EPM) provides you with additional horsepower to maintain efficiency in even the most demanding conditions.

ABSOLUTE DRIVING PLEASURE

The philosophy behind the design of the operator environment is to provide drivers with day-long comfort to help ensure productivity. The Horizon™ cab provides you with exceptionally low noise levels at a mere 70 decibels. A smooth ride is provided courtesy of Comfort Ride™ cab suspension and TerraGlide™ front axle suspension. A SuperSteer™ front axle is also available to meet the needs of tighter turning demands.

LOWER OPERATING COSTS

ECOBlue™ SCR technology provides you with impressive fuel savings of up to 10%, enabling you to slash your fuel bills while operating at higher productivity. And, best of all, New Holland’s long, 600-hour service intervals are still the industry benchmark.

EXACTLY WHAT IT SAYS ON THE HOOD

Look no further than the hood to understand how much power a T6 is packing. “T6” refers to the tractor’s category. The two digits after refer to the tractor’s maximum horsepower with Engine Power Management, rounded to the nearest ten. So, “T6.165” means that the engine is generating near 170 horsepower while at maximum boost.

PURE POWER AND ULTIMATE EFFICIENCY FOR MIXED FARMERS

When it comes to a mixed farmer’s tractor, New Holland understands that no two tasks are truly alike. With this knowledge, T6 tractors were designed to master multiple jobs from haymaking to row crop applications.

MAXIMUM VERSATILITY
Productivity comes standard thanks to an endless list of options including the choice between either a four-cylinder or six-cylinder engine, as well as the transmission options including a semi-powershift Electro Command™ transmission or Auto Command™ CVT transmission.

POWER AND PRODUCTIVITY
You’ll benefit from ECOBlue™ SCR Technology that’s used for Tier 4A compliance. Your NEF engine breathes only cool, clean, fresh air for ultimate combustion efficiency and performance. You get a more responsive engine as a result of the enormous 42% torque rise. Engine Power Management (EPM) provides you with additional horsepower to maintain efficiency in even the most demanding conditions.

ABSOLUTE DRIVING PLEASURE
The philosophy behind the design of the operator environment is to provide drivers with day-long comfort to help ensure productivity. The Horizon™ cab provides you with exceptionally low noise levels at a mere 70 decibels. A smooth ride is provided courtesy of Comfort Ride™ cab suspension and TerraGlide™ front axle suspension. A SuperSteer™ front axle is also available to meet the needs of tighter turning demands.

LOWER OPERATING COSTS
ECOBlue™ SCR technology provides you with impressive fuel savings of up to 10%, enabling you to slash your fuel bills while operating at higher productivity. And, best of all, New Holland’s long, 600-hour service intervals are still the industry benchmark.

EXACTLY WHAT IT SAYS ON THE HOOD
Look no further than the hood to understand how much power a T6 is packing. “T6” refers to the tractor’s category. The two digits after refer to the tractor’s maximum horsepower with Engine Power Management, rounded to the nearest ten. So, “T6.165” means that the engine is generating near 170 horsepower while at maximum boost.
There’s one standard feature that’s always guaranteed to provide you with superior comfort: the Horizon™ cab. When you step inside, it’s easy to understand how you will be more productive. New Holland took spacious dimensions and paid close attention to even the smallest details when designing this cab. Welcome to comfort.

360° VISIBILITY DESIGNED AROUND YOU
Do you want all around visibility and quiet? A full 63 square feet of glass provides you with clear visibility in all directions, as well as sound levels as low as 70 decibels. To make loader work easier and more comfortable, a high-visibility roof panel delivers a perfect view of a raised loader bucket. When you’re not using your loader, you can also open this panel for a nice breeze.

SELECT A SEAT
Three levels of air-ride seats are available: the standard air seat, the deluxe air seat with automatic adjustment, or the upgraded deluxe air seat with heated cushions and low-frequency air suspension. All seats swivel and adjust for maximum comfort. An optional full-size instructor seat allows your co-worker to ride in comfort, too.

COMFORT RIDE™ CAB SUSPENSION
Comfort Ride™ cab suspension provides you with the absolute smoothest ride, even over the bumpiest ground. This simple mechanical system uses two isolation “donuts” at the front corners of the cab, a swaybar, and two shock absorbers at the rear to isolate you from up and down motions and side-to-side swaying.
BRIGH L IGHTS FOR D A R K NIG HTS
A full array of work lights are available on all models. Angle the lights to suit your application and enhance safety, effectively turning night into day. These lights are easily controlled from a dedicated switch panel in the roof of the cab.

C O N T R O L Y O U R C L IMATE
The air conditioning system features dual zone technology to guarantee high performance in the hottest summers. You can individually position up to twelve vents to control the airflow for ultimate all-body comfort or super-fast defrosting. Controls are located to the right of the operator in the roof of the cab for easy, on-the-go adjustments. To further enhance your operating experience, add the automatic temperature control system to maintain your desired temperature.

A T A G L A N C E I N F O R M ATIO N
The enhanced instrument panel provides at-a-glance information of all key operating parameters including engine speed and the tractor’s AdBlue® level among many other measurements. A dedicated dot matrix display, which is navigated using the optional keypad cluster, means you can browse through a whole host of parameters including acres worked, PTO speed and even when your next service is due.

STANDARD AND LOW PROFILE ROOF OPTIONS
Two roof options are available to allow you to tailor the Horizon™ cab to better suit your needs. A low roof option (shown below) is available for farmers who need to enter low-clearance buildings for cleaning or feeding. A deluxe, high roof is available for general operation needs.

There’s one standard feature that’s always guaranteed to provide you with superior comfort: the Horizon™ cab. When you step inside, it’s easy to understand how you will be more productive. New Holland took spacious dimensions and paid close attention to even the smallest details when designing this cab. Welcome to comfort.

CLEAN AND PRODUCTIVE. POWERFUL AND EFFICIENT.

T6 tractors are powered by clean-running engines using proven ECOBlue™ SCR (Selective Catalytic Reduction) technology developed in partnership with Fiat Powertrain Technologies. SCR engines use AdBlue® Diesel Exhaust Fluid (DEF) to transform the harmful nitrogen oxides in exhaust gases into harmless water and nitrogen. This after-treatment system is separate from the main engine which means only clean, fresh air is fed into the engine. The result: a clean-running engine that offers improved performance, greater reactivity, and enhanced fuel efficiency.

REDUCED FUEL CONSUMPTION
Fuel use is reduced by a minimum of 10%* by combining super-efficient, breathable ECOBlue™ SCR technology with the latest engine management technology. Additionally, Engine Idle Speed Management reduces tick-over from 850 to 650 rpm during periods of prolonged idling, which means that when your tractor is waiting to work, it’s only sipping fuel.

ECOBLUE™ SCR: YOUR POWER GUARANTEE
ECOBlue™ SCR technology guarantees exceptional performance and high productivity, independent of fuel quality, sulfur levels, and the need for costly diesel additives.

ENGINE POWER MANAGEMENT
Engine Power Management is a New Holland feature that where the engine develops more power and torque according to the actual load on the transmission, hydraulics, and PTO. For example, EPM delivers up to 40 extra horsepower on a T6.165, but only when it is needed to maintain performance and optimize fuel consumption.

SELECT EITHER A FOUR OR SIX-CYLINDER ENGINE
Three, four and six-cylinder engines are available for you to choose from. These tractors offer power-to-weight ratios as low as 62.7 lbs/boosted horsepower to reduce fuel consumption and soil compaction.

ENGINE SPEED MANAGEMENT
In applications where a constant PTO speed is required, simply select Engine Speed Management. This feature ensures that the speed you select is accurately maintained, even under changing loads. In many applications, this allows you to maintain a fixed forward speed in difficult terrain.

INDUSTRY-LEADING SERVICE INTERVALS
Class-leading 600-hour service intervals are achieved through the use of conventional oils without compromising engine longevity. Count on New Holland to protect the environment, save you money, and eliminate downtime.

AMPLE FLUID CAPACITIES
Diesel fuel and DEF are both easily filled from ground level. The fuel tank on four-cylinder tractors has a capacity of 46.2 gallons (175 liters), while six-cylinder versions have a larger 60-gallon (227 liters) tank. 9.7 gallons (37 liters) of DEF is held in a separate tank.

*when compared to New Holland T6000 Series (Tier 3) tractors.
SMART SHIFTING

Perfect for general farm applications, the rugged, proven, semi-powershift transmissions allow you to make clutch-free gear changes within each working range.

16X16 ELECTROSHIFT™ TRANSMISSION WITH POWER SHUTTLE

The ElectroShift™ transmission provides you with push-button power shifting through the four gears in each of the four ranges, plus a clutch-free shift between the first and second and third and fourth. That means that when you’re moving through the 16 gears, you only need to clutch between second and third range. An electrohydraulic power shuttle provides clutchless forward and reverse shuttling for easier loader work.

16X16 AUTOSHIFT™ TRANSMISSION WITH POWER SHUTTLE

The 16X16 AutoShift™ transmission provides even more convenience than the ElectroShift™ transmission because it does the shifting for you. While out in the field, simply press the “Auto” button and allow the transmission to shift within the three lower working ranges. When you’re on the road, press the AutoShift button once to shift within either of the top two ranges, or press the AutoShift button twice to move freely from gears nine through sixteen and back down as needed without stopping.

17X16 AUTOSHIFT™ TRANSMISSION WITH POWER SHUTTLE

Two 17X16 transmissions are available for your selection. Choose the economy 17X16 that has a top speed of 25 mph (40 kph) at a reduced engine speed for additional fuel savings. Or, choose the faster 17X16 with a 31-mph (50-kph) maximum speed to save even more time while traveling between locations.

WORK TOGETHER: AUTOMATION, COMFORT, AND PRODUCTIVITY

Easy to set up and highly effective, Auto Transport and Auto Field modes can reduce the effort required to operate a T6 tractor over a long working day. With Auto Transport, the tractor seamlessly shifts ratios like an automatic car. It even senses if the tractor is being pushed by a loaded trailer while descending a hill. If it does, it holds the current gear to provide engine braking. Auto Field manages both the engine speed and transmission to optimize performance and economy. In PTO applications where a constant engine speed is the priority, the system selects the transmission ratio to match the load on the engine. In draft applications, engine speed is allowed to drop to fully exploit the available torque rise before selecting a lower ratio under load.

EASY SHUTTLING

A simple, easy-to-use power shuttle is featured on T6 tractors. This shuttle allows for easy forward and reverse direction changes without your hand leaving the steering wheel.

THE POWER TO COMMAND

Looking for the ultimate haying tractor? New Holland’s acclaimed Auto Command™ Continuously Variable Transmission (CVT) has been redesigned to fit the frame and workload of T6 tractors. Designed, developed, and built in-house, this award-winning transmission provides you with seamless speed changes to glide across the fields in an agile four-cylinder tractor.

SO SMART IT'S SIMPLE

At the helm of the Auto Command transmission is the Sidewinder™ II armrest. Created by New Holland for your operating pleasure, this intuitive console was developed thanks to the input of hundreds of farmers.

The IntelliView™ III or IV touchscreen monitors provide quick access to all tractor functions as well as compatibility with IntelliSteer™ Auto Guidance. Stepping up to the IntelliView IV provides a single display solution for all of Precision Farming functions.

GET A GRIP ON VITAL TRACTOR CONTROLS

Imagine being able to control eight different tractor functions from a single joystick. Sounds great, right? Well, now you will with the ergonomic, backlit, CommandGrip™. In addition to featuring numerous functions, the transmission responds to how you move the controller. Move the lever slightly and the transmission accelerates gradually. Move the lever forward quickly and the transmission responds even faster. A switch on the Sidewinder™ II console allows you to program this force-based system to match your operating preference.

SPEEDS FOR EVERY NEED

The Auto Command™ transmission allows you to set a target speed between 0.01 mph all the way up to 31 mph without range changes. Just seamless speeds to match every application’s need.

BLUE POWER EDITION

Choose the eye-catching Blue Power Edition on T6.160 Auto Command™ tractors. You’ll farm in style with distinct midnight blue paint, silver rims, exhaust guard, and grill inserts, carpeting, and a leather wrapped steering wheel.
THE POWER TO COMMAND

Looking for the ultimate haying tractor? New Holland’s acclaimed Auto Command™ Continuously Variable Transmission (CVT) has been redesigned to fit the frame and work-load of T6 tractors. Designed, developed, and built in-house, this award-winning transmission provides you with seamless speed changes to glide across the fields in an agile four-cylinder tractor.

SO SMART IT’S SIMPLE

At the helm of the Auto Command transmission is the Sidewinder™ II armrest. Created by New Holland for your operating pleasure, this intuitive console was developed thanks to the input of hundreds of farmers.

Use the multi-function CommandGrip™ controller for precision control over your tractor. Simply push it forward or backward to change speed or direction.

Loader or rear remote functions are easily controlled with the convenient joystick.

The Electronic Draft Control (EDC) mouse has been designed for simple, one-handed control. For added convenience, this mouse can be swapped in the location of the joystick if three-point hitch activities are done more frequently.

Easy-to-reach, color-coded paddles provide finger-tip hydraulic operation of electronic rear remotes.

Three-point hitch controls found under the padded armrest.

Adjust the Sidewinder™ II armrest forward or backward by pressing the convenient rocker switch.

The Integrated Control Panel (ICP) gives push-button interface to select key tractor functions, like your Acceleration Sensitivity Setting.

DURABILITY: FROM THE FRONT TO THE REAR

From the front axles to the hefty lift arms of the three-point hitch, you’ll find durable components everywhere you look on a T6.

SUPERSTEER® FRONT AXLE
The SuperSteer® FWD axle option increases the standard 55-degree turn angle to an unmatched 65-degrees. With sharper, faster turning, maneuvering in tight spaces and small fields is easy. Headland turn time is reduced by 35%, providing a huge advantage for row-crop operations.

SMOOTH TERRAGLIDE® FRONT AXLE
The TerraGlide® FWD axle option provides the ultimate smooth ride, as well as better traction, stability, and control across any terrain. In order to keep the axle in contact with the ground across rough fields or bumpy roads, the TerraGlide suspended front axle provides up to four inches of travel. More constant contact with the ground means more control and greater traction, which results in better stability, better steering control, and up to a 5% increase in strawbar pull.

TERRALOCK™ AUTOMATIC TRACTION MANAGEMENT
The TerraLock™ solution is simple to set up and operate. This traction system has three positions: off, full-time, and automatic. When set to automatic, the TerraLock system manages the engagement to the front axle, locking both the front and rear differentials. Forward speed and steering angle information dictate when the differential locks and, if required, four-wheel drive disengages. Why? To guarantee the tightest turning circles, reduce strain on the driveline, and provide positive traction. TerraLock is standard on SuperSteer and TerraGlide axles and is optional on other front axles.

REAR AXLE OPTIONS
T6 tractors allow you to tailor your rear axle to your needs as well. A heavy-duty flange axle and a 98-inch bar axle are available for maximum flexibility.

STOP ON A DIME
Standard heavy-duty offer impressive stopping performance since FWD engages automatically during braking. For operations that deal with demanding terrain, or need to frequently transport equipment down the highway, the extended life variant significantly improves longevity. Hydraulic trailer brakes can be equipped to further enhance stopping performance.

STRONG REAR THREE-POINT HITCH
You’ll handle heavy, three-point-mounted implements with ease. On tractors equipped with a fixed displacement pump and standard 90-mm lift rams, the rear three-point hitch can lift 6,720 lbs. (3,048 kg). For tractors with the OCLS system and optional 90-mm lift rams, the capacity is increased to 7,880 lbs. (3,560 kg). Convenient flexible link ends and telescopic stabilizers make hooking up implements even easier. Dynamic Ride Control also helps prevent three-point implements from bouncing on the hitch.

ELECTRONIC DRAFT CONTROL
Electronic Draft Control (EDC) is standard on all models. A single raise/lower switch makes it simple to lift and return an implement to work during a headland turn. New Holland’s ergonomic control is positioned to your right, just where you need it, for ultimate precision. To fine-tune the system, you can use the intuitive controls found underneath the armrest. You can even activate the headland management functionality with your thumb at the touch of a button.

FENDER-MOUNTED Switches
Fender-mounted switches can be equipped to raise and lower the three-point hitch for added convenience when hooking up to attachments. You can also use these controls to activate the PTO and/or operate remote number three if you choose to install three or more electrohydraulic remotes.

THE PERFECT FIT: FRONT LINKAGE AND PTO
A full-integrated front three-point hitch and PTO are available for enhanced versatility. You can access all linkage and PTO controls either from the comfort of the cab, or via the conveniently positioned controls on the linkage itself for greater efficiency when hitching. The linkage lifts up to 6,634 pounds (3,020 kg). The SuperSteer® front linkage package maintains super-tight turning, as the front linkage follows the turning angle of the front axle. You can also fold the linkage arms when not in use.
DURABILITY: FROM THE FRONT TO THE REAR

From the front axles to the hefty lift arms of the three-point hitch, you’ll find durable components everywhere you look on a T6.

SUPERSTEER® FRONT AXLE
The SuperSteer® FWD axle option increases the standard 55-degree turn angle to an unmatched 65-degrees. With sharper, faster turning, maneuvering in tight spaces and small fields is easy. Headland turn time is reduced by 35%, providing a huge advantage for row-crop operations.

TerraLock is standard on SuperSteer and TerraGlide axles and is optional on other front axles.

REAR AXLE OPTIONS
T6 tractors allow you to tailor your rear axle to your needs as well. A heavy-duty flange axle and a 98-inch bar axle are available for maximum flexibility.

STOP ON A DIME
Standard heavy-duty offer impressive stopping performance since FWD engages automatically during braking. For operations that deal with demanding terrain, or need to frequently transport equipment down the highway, the extended life variant significantly improves longevity. Hydraulic trailer brakes can be equipped to further enhance stopping performance.

STRONG REAR THREE-POINT HITCH
You’ll handle heavy, three-point-mounted implements with ease. On tractors equipped with a fixed displacement pump and standard 80-mm lift rams, the rear three-point hitch can lift 6,720 lbs. (3,048 kg). For tractors with the OCL5 system and optional 90-mm lift rams, the capacity is increased to 7,880 lbs. (3,600 kg). Convenient flexible link ends and telescopic stabilizers make hooking up implements even easier. Dynamic Ride Control also helps prevent three-point implements from bouncing on the hitch.

ELECTRONIC DRAFT CONTROL
Electronic Draft Control (ECD) is standard on all models. A single raise/lower switch makes it simple to lift and return an implement to work during a headland turn. New Holland’s ergonomic control is positioned to your right, just where you need it, for ultimate precision. To fine-tune the system, you can use the intuitive controls found underneath the armrest. You can even activate the headland management functionality with your thumb at the touch of a button.

FENDER-MOUNTED SWITCHES
Fender-mounted switches can be equipped to raise and lower the three-point hitch for added convenience when hooking up to attachments. You can also use these controls to activate the PTO and/or operate remote number three if you choose to install three or more electrohydraulic remotes.

THE PERFECT FIT: FRONT LINKAGE AND PTO
A full-integrated front three-point hitch and PTO are available for enhanced versatility. You can access all linkage and PTO controls either from the comfort of the cab, or via the conveniently positioned controls on the linkage itself for greater efficiency when hitching. The linkage lifts up to 6,834 pounds (3,200 kg). The SuperSteer® front linkage package maintains super-tight turning, as the front linkage follows the turning angle of the front axle. You can also fold the linkage arms when not in use.
RESPONSIVE HYDRAULICS

Rest assured there’s ample hydraulic power available to meet your needs. For tractors without the Auto Command™ CVT transmission, two impressive hydraulic systems are available.

FIXED DISPLACEMENT HYDRAULIC SYSTEM
A fixed displacement hydraulic system is standard. This system has an 18.5 gallon-per-minute (gpm) gear pump that provides sufficient flow for most farming applications. This open-center system is combined with a 12.4-gpm steering pump (10.5 gpm with the DualCommand™ transmission).

CLOSED-CENTER, LOAD-SENSING HYDRAULIC SYSTEM
If you have intensive tasks on your farm that require even more hydraulic capabilities than the traditional system, select the optional closed-center, load-sensing (CCLS) hydraulic system. A variable displacement piston pump provides 26.5-gpm flow to the rear remotes, three-point hitch, and loader. A separate 12.4-gpm pump provides flow for the steering and services circuit. Flow control is standard equipment and detents are provided as an available option.

REMOTE VALVES
You can select up to four electronic or mechanical rear remote valves. The remotes levers in the cab are color coded to correspond with the rear remotes outside of the tractor for simplicity when hooking up implements. You can also equip up to three mid-mount remote valves to operate the front linkage or a loader. These remotes are controlled via an ergonomic, fully integrated joystick in the cab.

SOFT START PTO
The reversible 540/1000 rpm PTO engages electrohydraulically for smooth starts. It features Soft Start for added implement protection during start up. The PTO is engaged via a push-pull control, with advanced Soft Start management. This modulates engagement of high-inertia attachments to protect the driveline.

HEADLAND MANAGEMENT: HASSLE FREE REPEATABILITY
Only available on models with electrohydraulic remotes, headland management allows you to easily record and store up to 28 sequenced operations at the headland. These can then be played back at the touch of a button. This intuitive system is a great way to improve repeatability and efficiency, while also reducing fatigue when working over extended periods.
RESPONSIVE HYDRAULICS

Rest assured there’s ample hydraulic power available to meet your needs. For tractors without the Auto Command™ CVT transmission, two impressive hydraulic systems are available.

FIXED DISPLACEMENT HYDRAULIC SYSTEM
A fixed displacement hydraulic system is standard. This system has an 18.5 gallon-per-minute (gpm) gear pump that provides sufficient flow for most farming applications. This open-center system is combined with a 12.4-gpm steering pump (10.5 gpm with the DualCommand™ transmission).

CLOSED-CENTER, LOAD-SENSING HYDRAULIC SYSTEM
If you have intensive tasks on your farm that require even more hydraulic capabilities than the traditional system, select the optional closed-center, load-sensing (CCLS) hydraulic system. A variable displacement piston pump provides 26.5-gpm flow to the rear remotes, three-point hitch, and loader. A separate 12.4-gpm pump provides flow for the steering and services circuit. Flow control is standard equipment and detents are provided as an available option.

REMOTE VALVES
You can select up to four electronic or mechanical rear remote valves. The remote levers in the cab are color coded to correspond with the rear remotes outside of the tractor for simplicity when hooking up implements. You can also equip up to three mid-mount remote valves to operate the front linkage or a loader. These remotes are controlled via an ergonomic, fully integrated joystick in the cab.

HEADLAND MANAGEMENT: HASSLE FREE REPEATABILITY
Only available on models with electrohydraulic remotes, headland management allows you to easily record and store up to 28 sequenced operations at the headland. These can then be played back at the touch of a button. This intuitive system is a great way to improve repeatability and efficiency, while also reducing fatigue when working over extended periods.

SOFT START PTO
The reversible 540/1000 rpm PTO engages electrohydraulically for smooth starts. It features Soft Start for added implement protection during start up. The PTO is engaged via a push-pull control, with advanced Soft Start management. This modulates engagement of high-inertia attachments to protect the driveline.
THE SCOOP ON LOADERS

T6 tractors are ready-made for productive loading with their convenient left-hand shuttle, numerous front-axle options, and optional high-visibility roof panel.

THE PERFECT DUO

New Holland 835TL loaders are designed to fit T6 tractors. The 835TL is built for four-cylinder models without the SuperSteer™ axle, while the 845TL is compatible with all models. Lastly, an 855TL can be equipped on any six-cylinder tractor. With these loaders, you can achieve a lift capacity of up to 5,720 pounds and a breakout force up to 5,962 pounds, allowing you to lift, load, fill, and stack large loads with maximum efficiency. The 13-foot lift height also allows you to place loads exactly where you need them.

HANDY JOYSTICK

The position of the seat-mounted joystick control adjusts to suit you. A rocker switch on the joystick knob allows you to electro-hydraulically control implements with third-function hydraulics.

FOPS: YOUR SAFETY PARTNER

Horizon™ cabs are fully FOPS (Fall On Protection System) compliant to guard against injury from falling objects.

BUCKET CHOICES

Choose from a wide variety of buckets to use on your loader. Available attachments include, but are not limited to:
- High-capacity material bucket
- Grapple bucket
- Manure fork
- Stone fork
- Bale spike
- Pallet forks
- Square bale fork
- Silage King fork and grapple

LOAD IN STYLE

A special black mechanical self-leveling loader is available for T6.160 Auto Command tractors with the Blue Power package. This eye-catching loader features silver cylinders and decals that match the tractor’s silver rims, exhaust stack guard, grill inserts, and decals.

360° SERVICE ACCESS

T6 tractors are designed to spend more time working in the fields and less time in the shop. All service points are easy to access, and super-long service intervals mean that you’ll spend more time operating out in the fields or on your farmstead.

The engine air filter is easy to check, clean or replace, with no need for tools.

The engine hood opens wide for full service access.

The packaging saves time and effort.

Engine oil check and fill points are easy to reach, with no need to lift the hood. This makes routine checks faster and servicing simpler. You also enjoy the long 600-hour service interval you’ve come to expect from New Holland.

AdBlue®

WILL I BE ABLE TO FIND ADBLUE® EASILY?

The answer is yes! It will be available on your doorstep, through CNH Parts & Service; just contact your local dealer for more information. If that wasn’t enough, AdBlue can even be delivered direct to your farm for absolute convenience.

SERVICES AND SPECIFICATIONS

- You also enjoy the long 600 hour service interval you’ve come to expect from New Holland.

### AdBlue®

**WILL I BE ABLE TO FIND ADBLUE® EASILY?**

The answer is yes! It will be available on your doorstep, through CNH Parts & Service; just contact your local dealer for more information. If that wasn’t enough, AdBlue can even be delivered direct to your farm for absolute convenience.
There’s a certain way of thinking that comes from living on a farm. Farming takes equal parts brain and brawn. Not to mention thick skin, calloused hands and a fair share of know how. Seasoned farmers know it helps to have equipment that’s built by farmers, sold by farmers and used by farmers. You might call that instinct, but we call it fieldSMART™.

Support at every step. When you place your confidence in New Holland agricultural equipment, you get the finest in local support. Your New Holland dealer understands the many challenges you face and stands behind you at every step with the equipment, parts, service and financial solutions to make your job easier. Look to New Holland for a complete selection of equipment, including a full line of tractors, hay & forage equipment, harvesting, crop production and material handling equipment.

Quality parts and service. Turn to your New Holland dealer after the sale for expert, factory-trained service and genuine New Holland-branded parts. Your dealer has the very latest service updates and training to ensure your equipment keeps working productively season after season.

Financing solutions. Your New Holland dealer can tell you about smart ways to turn your financial challenges into opportunities with a portfolio of innovative financial services available through CNH Industrial Capital, including customized financing, leasing, insurance and the purchasing convenience of a Commercial Revolving Account.

For reliable equipment, parts and service – or just honest advice on farming and finance – turn to New Holland and your trusted New Holland dealer. We know. We’re farmers, too.
