GENESIS® T8 SERIES TRACTORS
MAKE EVERYTHING POSSIBLE.

New Holland DNA runs through every aspect of GENESIS® T8 Series tractors, which means you’ll notice unique, innovative features that make you and your operation more productive. Power, fuel efficiency, stability and maneuverability are all rolled into this one-of-a-kind tractor.

MORE POWER AND PRODUCTIVITY
GENESIS T8 Series tractors are the most powerful conventional tractors in the world. Five models range from 250 rated engine HP to the top-of-the-line GENESIS T8.435, featuring 380 rated engine HP. Every GENESIS T8 is powered by a state-of-the-art FPT powerplant that boasts award-winning ECOBlue™ HI-eSCR technology for Tier 4B compliance. Every GENESIS T8 model benefits from Engine Power Management (EPM) which offers more power in demanding hydraulic, PTO and transport applications. To put more power to the ground while reducing compaction, consider the GENESIS T8 models with the SmartTrax™ track system.

ABSOLUTE DRIVING PLEASURE
New Holland’s award-winning SideWinder™ II armrest makes the GENESIS T8 Series intuitive to operate. All key functions have been perfectly placed for fingertip control and reduced operator fatigue. The 68-decibel, whisper-quiet cab is the most spacious in its class and offers uninterrupted 360° visibility, which has been further improved with the optional split wide-angle electric mirrors. The optional Luxury Performance Cab includes the Auto Comfort™ seat, which features weight-compensated damping and integrated ventilation, further enhancing the operating experience. Optional Comfort Ride™ cab suspension ensures the smoothest ride, even on the roughest terrain.
GENESIS T8 tractors carry the legendary GENESIS name—a proud reminder of the original Genesis tractors that redefined what was possible 20 years ago and proved an instant success with the nation’s farmers. True to the GENESIS name, today’s GENESIS line is still redefining what is possible, continuing the legacy. You too can be part of the GENESIS legacy.

**MAXIMUM VERSATILITY**

The GENESIS T8 wheelbase is the longest in the industry for a smooth, stable ride, yet the sculpted frame design makes these tractors the most maneuverable in their class. Built to suit heavy tillage applications, the GENESIS T8 is also ideal for planting, spreading and transport. A choice in transmission further enhances GENESIS T8 versatility. Choose between the Ultra Command™ transmission—the most powerful full powershift in the business—or the Auto Command™ continuously variable transmission (CVT) for unsurpassed ease of CVT operation. The Custom Headland Management system means you can modify and customize pre-recorded end-of-row turn sequences. Add the fully integrated front hitch and PTO option and you can work with a full range of front-mounted implements for added versatility.

**LOWER OPERATING COST**

Operating costs for the GENESIS® T8 tractors with ECOBlue HI-eSCR technology have been maintained when compared to T8 Tier 4A tractors. Furthermore, fuel use is still up to 10% better than when compared to T8000, Tier 3 products. This is all thanks to cutting-edge ECOBlue HI-eSCR technology.
NO COMPROMISES

Inspired by the forward-thinking commitment and can-do attitude of our customers, New Holland developed the GENESIS® T8 Series tractors to redefine what you expect from your tractor. There’s no need to compromise when you own any of the FIVE NEW GENESIS T8 Series tractor models.

HANDLE THE MOST DEMANDING TASKS WITH EASE

GENESIS T8 tractors are the best choice for farmers and custom operators alike. They make it possible to improve efficiency and productivity in all types of fields and in the most challenging conditions. The revolutionary, precision-designed front-end allows an impressive 55° turning angle for tight end-of-row turns. And with the longest wheelbase in its class, the GENESIS T8 delivers unmatched stability and impressive draft performance. Whether you’re planting corn, digging sugar beets, or pulling a grain cart, you can rely upon your GENESIS T8 to tackle the toughest tasks and deliver maximum performance and dependability while doing it.

POWERFUL PROOF IS IN THE NUMBERS

ECOBlue™ HI-eSCR improves the exceptional performance and high productivity that you’ve come to expect of your T8 tractor. Every GENESIS T8 tractor delivers higher rated and maximum power to boost your output. Look at the numbers. A GENESIS T8.320 has an engine rated at 250 horsepower but with EPM, will produce up to 320 horsepower. The same story is true for every GENESIS T8 model. When you get to the mighty GENESIS T8.435, it has an engine rated horsepower of 380 but will put out up to 435 horsepower using EPM technology.
**EXACTLY WHAT IT SAYS ON THE HOOD**
To know the true power that’s under the hood of your GENESIS T8 tractor, just look ON the hood. The three digits after “T8” refer to the maximum horsepower with Engine Power Management. Rated engine power is a useful reference, but it’s only part of the story. With Engine Power Management, GENESIS T8 tractors develop more torque and power as they are put under load. That gives you peace of mind knowing your T8 tractor will be able to cope with even the most demanding applications.

**UNMATCHED FLEXIBILITY**
GENESIS T8 tractors offer a whole host of options and customizable features to ensure that they perfectly match your operating requirements. Choose between the Auto Command™ continuously variable transmission for precision speed control and a selection of powerful Ultra Command™ full powershift transmissions. With 75 gallons per minute hydraulic flow courtesy of the MegaFlow™ option, you can handle the hydraulic demands of large implements. The fully integrated front hitch and PTO option is ideal for hay and forage operations. The large IntelliView™ IV touchscreen allows control of key tractor functions, and also allows single monitor integration with PLM™ precision farming solutions.
THE STABILITY, TRACTION, SPEED AND COMFORT OF A LONG WHEELBASE... AND THE AGILITY YOU WANT.

A longer wheelbase means greater stability at high transport speeds, and more traction for demanding heavy drawbar applications. GENESIS® T8 Series tractors offer it all. GENESIS T8 tractors have an impressive wheelbase of 11'4" (Ultra Command™ models) — that's 14 inches longer than the nearest competitor. This has been further stretched to a mighty 11'8" on the flagship GENESIS T8.435. That's a full 18 inches longer than the nearest competitor, all contained within an overall length of a mere 21'3".

SMOOTH TERRAGLIDE™ FWD AXLE
Choose the New Holland TerraGlide™ suspended front axle option for improved traction, steering and ride smoothness. The TerraGlide axle is proven to protect the tractor, mounted implements and the operator from heavy shock loads during transport and in the field. Combined with the Comfort Ride™ cab suspension option, you get the ultimate smooth ride with no compromise in maneuverability.

**T8.435 dimensions include 5" rear axle and HD CAT IV rear linkage
TRANSPORT SAFETY
Applying both brake pedals engages both rear brakes and also activates the mechanical front wheel assist to provide quicker and more controlled deceleration. The optional engine braking system further improves safety by helping to reduce the need for repeated braking in difficult terrain and on the road.

TERRALOCK™ TRACTION MANAGEMENT
The TerraLock™ system automatically manages FWD engagement as well as engagement of the front and rear diff lock. Of equal importance, the system takes care of disengaging FWD during a headland turn to optimize maneuverability.

AGILITY IS PART OF THE PACKAGE, TOO
The GENESIS T8’s long wheelbase also offers excellent maneuverability. Two concepts which don’t normally go together! New Holland achieves it with the bold, sculpted hood and frame. They enable the wheels to tuck in tight to the tractor body to achieve an impressive 55° turning angle. You make tight headlands turns for the improved productivity and efficiency you expect from New Holland.

HEAVY-DUTY AXLES FOR HEAVY DUTY PERFORMANCE
The five-inch heavy-duty axle is standard equipment on the GENESIS T8.435. The five-inch bar axle means that every last drop of power is transmitted to the ground for ultimate in-field performance.
OUTSTANDING VERSATILITY.  
UNSURPASSED PRODUCTIVITY. 
WELCOME TO HIGH-PERFORMANCE FARMING.

GENESIS® T8 Series tractors continue to reinvent the concept of high-horsepower farming. New Holland’s SmartTrax™ rear track system unlocks the true potential of your GENESIS® T8 tractor. The SmartTrax has a larger footprint allowing you to go even beyond what is possible with standard tires for more productive farming. You get the choice of numerous track spacing and belt widths. The benefits are many: reduced compaction, increased efficiency, better traction, enhanced stability.

Twin track systems have been integral in farming operations for many years. Increased traction with reduced compaction has been the main selling point of twin track systems, but they have their downfalls. Now, New Holland is totally reshaping how the industry defines twin track systems.

TREADING LIGHTLY
SmartTrax™ offer up to a 65% higher contact area with the soil than their wheeled equivalents. So what? Well, it means that by spreading the load over a wider area you can reduce soil compaction. Lower compaction means higher yields. You can also gain time lost due to wet conditions since you can get into your fields earlier and work on wet spring ground.
MANEUVERABILITY AND HANDLING THAT'S COMPARABLE TO A WHEELED TRACTOR
With the New Holland SmartTrax system, you now get the benefits and comfort of a conventional wheeled tractor with the traction power and floatation of a tracked unit. Unlike typical twin track systems, the SmartTrax system provides outstanding maneuverability, full power turns, reduced berming and ridging—all while delivering excellent ride quality.

ADVANTAGE SMARTTRAX™
SmartTrax™ rubber track technology is the fruit of many years of intensive research and development, in collaboration with farmers the world over. SmartTrax tracks feature some of the most advanced technology to ensure they deliver advantages in your fields. Day in. Day out. All year round.

FULL POWER TURNS WITH NO POWER LOSS OR RIDGES AT THE HEADLAND
The GENESIS T8 SmartTrax offers the best of both worlds: tight turning courtesy of the front wheels and ultimate traction from the rear tracks. The result: full power turns. Unlike other twin-track systems on the market, the GENESIS SmartTrax turns just like a wheeled tractor at the headland, leaving no ridges. You can continue to cultivate during headland turns to improve your productivity.

TRACTION WITHOUT QUESTION
The SmartTrax design ensures positive contact with the soil and unsurpassed traction when pulling heavy draft loads or in the field, in marginal conditions

POSITIVE DRIVE. EFFICIENT.
Up to eight positive lugs on the inner side of the tracks maintain engagement with the drive wheel at all times for the ultimate in efficient power transmission.

TROUBLE-FREE TRACK TENSIONING
SmartTrax feature a continuous heavy-duty tensioning system, which ensures that the correct track tension is always maintained for ideal traction. This automatic hydraulic system requires no operator input, so you can get on with the serious business of farming. Moreover, the tensioning system is completely separate from the drive wheel, for ultimate simplicity and reliability.
**IMPROVED RIDE QUALITY**

The New Holland design of wheels in front and tracks in back results in a smoother ride. Since the two axles can react independently to changing contours in the field, they can effectively absorb them, eliminating the see-saw motion of single-track machines, improving riding comfort.

**SMARTTRAX™ REAR TRACK SYSTEM**

**SMARTTRAX™ SYSTEM WITH TERRAGLIDE™ SUSPENSION: MAXIMUM TRACTION**

The Terraglide™ front axle suspension has been fine-tuned specifically for the GENESIS T8 SmartTrax line. It improves traction and enhances comfort by counteracting bouncing to produce a smooth ride. When this is combined with Comfort Ride™ cab suspension, you have ultimate control of your GENESIS T8 during high-speed road transport.

**PERFECTLY BALANCED OPERATION**

The GENESIS T8 SmartTrax two-axle configuration enables power to be distributed through both axles for more balanced operation. When towing heavy loads, or during tillage operations, the power delivered to the front wheels counterbalances the load on the rear of the tractor.
A TRACK TO SUIT YOUR NEEDS

SmartTrax™ belts are available in four widths to suit your operation. The standard 16" and 18" versions are available with the narrow undercarriage and are perfect for most row crop operations. The 24" and 30" versions are available with the wide undercarriage, ideal for tillage, broadacre drills, and grain carts. They spread the load even wider for even lower compaction and even more traction.

FLEXIBLE TRACK SPACING
Many different variables dictate the required track spacing. You can select a track spacing of between 76" to 152" to ensure the perfect width for your field.
AT 68 DECIBELS, IT’S THE QUIETEST, MOST SPACIOUS CAB IN ITS CLASS.

Settle into the seat of a GENESIS® T8 tractor. Fire up the engine. Get into the field. Take in the expansive view. Let your hand effortlessly master the controls on the SideWinder™ II armrest. Appreciate the smooth power, the whisper-quiet surroundings and expansive, industry-leading 109.5 cubic feet of interior space. Notice how the seat, cab and axle suspension cushion your ride. See how easy it is to use IntelliView™ IV touchscreen. You’ll find it doesn’t take long to get used to excellence.

REDUCING SHOCK LOADS AND FATIGUE

Day in, day out, the optional Comfort Ride™ cab suspension reduces shock loads reaching the operator by up to 25%. The result? Less fatigue during long and productive work days.
THE MOST COMFORTABLE SEAT ON THE FARM
Comfort is guaranteed thanks to the deluxe air-suspension seat that comes as standard equipment. For operators who spend extended hours in the tractor, the enhanced comfort of the ventilated, fully active Auto Comfort™ seat is worth considering. This premium seat uses a network of sensors to automatically calibrate damping on-the-go depending on the operator’s actual weight, for the smoothest ride ever. The seat also features advanced ventilation technology, which warms the body on cold days and efficiently whisks away perspiration for ultimate comfort in all weather.

YOUR FIELD . . . IN VIEW
New Holland tractors are known for outstanding visibility and GENESIS T8 tractors follow in that tradition. The fully glazed door, large windshield and glass area combine to ensure 360° visibility. You have an especially impressive view to the front, with easy visibility over the fenders and slim engine hood. You need to experience it.

EYES IN THE BACK OF YOUR HEAD
The optional wide-angle split-view mirrors feature an electronically adjustable top section so you get the best possible view of the road during high-speed transport. The lower section of the mirror is designed to counteract blind spots. You can place it precisely where you like. Want more? They’re heated too, to get rid of moisture or frost in a flash!

CUSTOMIZE YOUR WORKING ENVIRONMENT
Set your preferred in-cab working temperature and the optional automatic climate control system maintains this setting, adjusting to suit ambient conditions. Pull down the cab blinds to stay cool.

FROM DUSK TO DAWN
Cab roof, engine hood and fender worklights are easy to control from a dedicated switch panel. Demanding operations select the optional LED package. The operator can set up the lights to match a broad range of applications for safer, more productive operation.
SIDEWINDER™ II. THE ULTIMATE ERGONOMIC FARMING EXPERIENCE

At New Holland, we know it’s SMART for you to be comfortable for as long as it takes to get the job done. That’s why GENESIS® T8 tractors are designed around you with ergonomically placed controls. The award-winning SideWinder™ II armrest reduces fatigue, allowing fingertip access to everything you need. The patented design allows the SideWinder II armrest to glide forward or back electronically to adjust to the perfect position for every operator.

CONTROL AT YOUR FINGERTIPS

It’s easy to master a GENESIS T8 tractor. At the front of the SideWinder armrest is the CommandGrip™ multi-function controller. It provides fingertip access to your most frequently used controls and is now back-lit. And, the IntelliView™ IV touch-screen display is also up front, providing information at a glance and quick access and control of key functions.

- Rear linkage raise/lower. To activate front linkage raise/lower, push the button on the rear of the CommandGrip controller simultaneously with the raise/lower function.

- Optional IntelliSteer™ auto guidance, automated steering engagement.

- Forward/reverse shuttle switch.

- Fingertip control for up to two remote valves.

- Adjust GSM target speed. Ultra Command FPS transmission.

- Custom Headland Management. Press to record, store and activate automated headland turns.

- Electronic SideWinder II adjustment. Move the armrest to the position that suits you.
INTELLIVIEW™ TOUCHSCREEN DISPLAY

The Intelliview IV display is a large 10.4 inch touchscreen display that provides a single interface for fingertip adjustment of key settings as well as compatibility with precision applications such as New Holland's Intellisteer™ auto guidance and implement control using either Intellirate™ control or the ISOBUS task controller.

- Personalized positioning of the hydraulic joystick and rear linkage mouse available as a factory-fit option.
- Select paddle or joystick control for remote valves 3 and 4.
- Throttle up to your desired engine speed, select Engine Speed Management, and the speed is fixed.
- Press the Custom Headland Management button to record and replay the functions you use most frequently.
- Engage TerraLock™ and it will automatically manage four-wheel drive and differential lock selection.
- Three point hitch inching control.
- Auto PTO will disengage and reengage the PTO during a headland turn.
- Engage and disengage the front suspension.
- Engage and disengage the front PTO instantly.
- Rear linkage mouse. Lift heavy mounted implements with absolute precision.
- Multi-function joystick. The joystick can be set to operate the front linkage, or remote valves.
- Electronic remotes. Easy to reach paddles provide fingertip hydraulic operation. Flow and timing can be simply adjusted through the IntelliView™ touch screen.
- Full access to more advanced controls under the padded armrest.

FARMING LUXURY

The available GENESIS T8 Luxury Performance Cab has been designed for those of you who spend more time in your cab than out of it. The full leather steering wheel, leather seat and deep pile carpet are available on all GENESIS T8 models.

The available GENESIS T8 Luxury Performance Cab has been designed for those of you who spend more time in your cab than out of it. The full leather steering wheel, leather seat and deep pile carpet are available on all GENESIS T8 models.
GENESIS® T8 tractors incorporate the very latest Precision Land Management (PLM™) technology to increase the productivity of your operation, decrease operating costs and make your work easier overall. You get all this and more with the touch of a button.

ALL WIRED UP AND READY FOR YOUR CHOSEN GUIDANCE SYSTEM

You can specify your GENESIS T8 Series tractor with a factory-fitted, fully integrated New Holland-designed and -developed IntelliSteer™ automatic steering system. The system uses DGPS or RTK technology to help ensure parallel pass-to-pass accuracy as precise as +/- 1 inch (2.5 cm)*.

* Using RTK correction signal.

INTELLISTEER™ AUTO GUIDANCE MAXIMIZES YOUR EFFICIENCY AND PRODUCTIVITY

INTELLIVIEW — VISIBLE INTELLIGENCE

The IntelliView™ IV display provides a single display solution for controlling key tractor functions and IntelliSteer™ auto guidance. This combination controls mixed fleets of implements, and other precision applications such as-applied mapping and implement control systems including PLM™ IntelliRate™ Control and the PLM ISOBUS task controller. It allows you to program a variety of guidance patterns, personalize your settings and easily transfer information from your tractor to your Farm Management Software.

INTEGRATED CONTROL SYSTEMS

The New Holland IntelliSteer system uses built-in T3 terrain compensated correction signals (roll, pitch, yaw) to keep the Navigation Controller II informed of the tractor’s orientation. Also integrated into the hydraulic system is a control valve which converts the signals from the Navigation Controller II into hydraulic movements of the steering system.

* Using RTK correction signal.
FULLY INTEGRATED INTELLISTEER GUIDANCE
Your guidance system choice depends on your intended applications and the need to integrate with existing systems. All T8 IntelliSteer options operate via factory installed systems that facilitate installation and allow for easy modifications and upgrades whenever needed.

ON AND OFF SIMPLICITY
A single button on the CommandGrip™ controller activates the IntelliSteer system. It doesn’t get easier than that.

NH 372 GNSS RECEIVER
This receiver is GLONASS enabled and has the ability to track up to 44 satellites at any one time, greatly increasing your satellite coverage and uptime. It is compatible with WAAS, OmniSTAR®, CenterPoint™ RTX™, or RTK corrections. When using RTK for high-precision sub-inch accuracy, an RTK radio mounts under the receiver.

FULL LASER LEVELING INTERFACE
The GENESIS T8 tractor electrohydraulic system is “plug and play” compatible with a wide range of third-party laser-controlled leveling systems.

LEVELS OF ACCURACY AND REPEATABILITY
New Holland offers a wide range of accuracy options, allowing you to choose which accuracy level best fits your needs. IntelliSteer™ Auto Guidance gives precise sub-inch accuracy and reliability using RTK.

ISOBUS COMPATIBLE
GENESIS T8 series tractors are ISOBUS compliant and have the ability to control ISO compliant implements using the PLM ISo task controller with the IntelliView™ IV touchscreen display mounted in the tractor’s armrest.

RTK BASE STATION
For the highest degree of accuracy, use an RTK base station that broadcasts a correction signal that allows you to achieve sub-inch pass-to-pass accuracy.
THE POWER AND EFFICIENCY YOU’VE COME TO EXPECT FROM NEW HOLLAND

Your GENESIS® T8 tractor is powered by an ECOBlue™ HI-eSCR (High-Efficiency Selective Catalytic Reduction) Cursor 9 engine developed by New Holland’s sister company, FPT Industrial. These engines, which comply with the even-more-stringent Tier 4B emissions standards, offer you four key benefits:

**Performance:** You get more power, torque, torque back-up and engine power management while maintaining outstanding transient response.

**Efficient operation:** Fluid consumption (diesel plus DEF) is the same or better than Tier 4A T8 tractors. You will also benefit from reduced life-long operating costs.

**Simplicity:** The simpler engine solution ensures a higher power potential and the reduced cooling system delivers more efficient operation.

**Consistency:** There’s no change in vehicle operation. Like the previous Tier 4A models, the new Tier 4B models use an after-treatment system using AdBlue® Diesel Exhaust Fluid (DEF) to transform harmful nitrogen oxides into harmless water and nitrogen.

**INSIDE ECOBLUE™ HI-ESCR**

This new system is an evolution of the existing ECOBlue SCR system featuring the highest NOx conversion efficiency in the industry. This multi-patented system uses a new Engine Control Unit, which not only manages the engine, but also the HI-eSCR after-treatment system by controlling the supply and dosing modules. Using a dedicated closed-loop system, it continuously monitors the NOx levels in the exhaust gases, ensuring that during every cycle the precise amount of DEF is injected to achieve NOx conversion of over 95%, all while guaranteeing low fluid consumption.
THE IMPORTANCE OF TRANSIENT RESPONSE
At New Holland, we’re passionate about transient response. It’s your productivity guarantee. Put simply, since your Cursor 9 engine breathes only clean fresh air, it can react more quickly when placed under load—a lot more quickly in fact. So when you’re transporting heavy trailers or grain carts and you encounter a hill, you’ll be able to maintain constant forward speed with no slow down. Transient response: we’ve got it covered.

ENGINE POWER MANAGEMENT
Engine Power Management (EPM) is a renowned New Holland tractor feature. In short, the engine develops more power and torque according to the load on the transmission, during hydraulics, PTO, and transport operations. On a GENESIS T8.380 tractor, EPM will deliver up to 71 horsepower extra, but only when it is needed, to maintain performance.

SAVE FUEL TO REDUCE YOUR CARBON FOOTPRINT
Emissions released from burning diesel are a significant contributor to a farm’s overall carbon footprint. ECOBlue HI-eSCR technology for Tier 4B compliance reduces NOx emissions while maintaining impressive fuel efficiency, bringing about a substantial cut in your farm’s carbon emissions. Visit www.carbonid.newholland.com to find out how much carbon you could save!

POWERED BY FPT INDUSTRIAL
New Holland is not going it alone when it comes to Tier 4 technology. They can draw on the experience of their in-house engine development group: FPT Industrial.

Pioneers: Fiat invented Common Rail technology in the 1980s. They were the very first to introduce it on agricultural machines on the TS-A tractor. Pioneering. Always.

Cleaner: Fiat Industrial has topped the Dow Jones Sustainability World and Europe indexes for the Industrial Engineering sector for two consecutive years. Cleaner. Everywhere.

Proven: FPT Industrial has pioneered SCR technology since 1995 and has already produced over 350,000 SCR engines during the last six years for the agricultural, construction and trucking industries. The award-winning HI-eSCR solution has been extensively tested and has clinched numerous awards. Reliability. Confirmed.
No matter which Ultra Command™ powershift transmission you choose, you get a minimum of 18 forward speeds, with eight of them in the critical 3- to 8-mph tillage range—more than other tractors in this class.

**GSM. INTELLIGENT AUTOMATION**
New Holland Ground Speed Management (GSM) is more than just an automated transmission shift system. It uses a combination of data relating to engine load, forward speed and operator setting, to manage both engine and transmission speeds to optimize performance and economy. Simple to set up and extremely efficient, GSM is proven and dependable.

**FIXED FORWARD SPEED? GSM TAKES CARE OF IT**
When load conditions change in the field, GSM will automatically maintain a fixed forward ground speed. First, you set your desired working speed, then select the GSM function. The automated system will then match engine and transmission speeds to maintain this fixed forward speed. This allows you to get maximum productivity without compromising economy.
INTELLIVIEW - GEAR AND SPEED AT A GLANCE
The standard IntelliView™ IV display offers easy toggling between screens to display information that includes the exact engine speed and the selected transmission ratio. This information is duplicated on the “A” pillar display, ensuring you always have key operating data.

FULL COMMAND IN TRANSPORT
During road transport, GSM automatically shifts the transmission according to load and throttle settings. With heavy loads, GSM downshifts to assist with engine braking on steep inclines.

A FULL POWERSHIFT UP TO 410 EPM HP
The Ultra Command™ full powershift transmission is available on GENESIS® T8.320 through the GENESIS T8.410 models, and matches proven mechanical efficiency with easy control. The result? A transmission that is easy to set-up and operate with a speed to perfectly match every application. The CommandGrip multi-function controller on the SideWinder™ II armrest gives you fingertip access to automated features, including Ground Speed Management. Choose between 18x4, 19x4 (economy overdrive or 31-mph high-speed) and 23x6 creeper powershift transmissions. Easy operation is standard on all.

POWER SHUTTLE
You can operate the forward/reverse shuttle using either the lever mounted to the left of the steering column or the CommandGrip controller on the SideWinder II armrest. It’s easy to program your preferred forward/reverse shuttling speeds.
INNOVATIVE AUTO COMMAND™ CVT OFFERS ADVANCED NEW HOLLAND FEATURES

The Auto Command™ continuously variable transmission (CVT) further enhances GENESIS® T8 Series productivity and is available on the GENESIS T8.320 through GENESIS T8.410 and standard on the GENESIS T8.435. Designed and built by New Holland, the multi award-winning Auto Command CVT has reached a milestone with more than 10,000 built. Combine the simplicity and efficiency of Auto Command with the GENESIS T8.435, with 435 EPM HP, and you have the world’s most powerful conventional CVT tractor. Ever.

- Auto Command responds to the amount of force you apply to the CommandGrip controller. Move the lever gently for gradual response, aggressively for quick response. A switch on the integrated control panel (ICP) allows you to adjust the responsiveness of speed changes. You can also control forward speed using the foot pedal.

- Target speed adjustment – set a target speed to match your exact needs. Perfect when moving between fields or when crop yields have altered.

- Target speed selection – allows you to change between six (3F/3R) target speeds.

- 4 DRIVING MODES TO SUIT YOUR DRIVING STYLE
  - Auto Mode. Select the desired target speed and Auto Command will match the engine and transmission to maintain it.
  - Cruise Mode. When you achieve the desired operating speed, Cruise Mode allows you to set the transmission to maintain the speed for economy and productivity.
  - Manual Mode. Set the required engine and forward speed.
  - PTO mode. As soon as the PTO is engaged, Auto Command will operate to guarantee a constant engine speed.

FAST DIRECTION CHANGES
Changing direction is simple with Auto Command. Either move the entire CommandGrip™ handle forward or back, use the power shuttle switch on the CommandGrip handle or use the shuttle lever mounted on the steering column.
4 POINTS OF 100% MECHANICAL EFFICIENCY
The Auto Command transmission delivers an industry-leading four points of 100% mechanical drive efficiency. Precision-engineered to ensure that they perfectly match to the most frequently used speeds during heavy draft work, planting, high-speed field work like baling or mowing, and high-speed transport activities. Quite simply, it is the smoothest and most productive CVT around.

A SPEED FOR EVERY NEED
Auto Command technology gives you infinite and seamless speed-changing ability. Set your target speed anywhere between 65 feet per hour right through 31 mph and regulate it to the nearest 0.01 mph. No steps. No range changes. Just seamless speeds to match your every need.

EASE AND SIMPLICITY
Auto Command is simple to program and easy to operate, allowing you to maintain day-long productivity. Control your Auto Command CVT effortlessly with the CommandGrip handle and program three forward and three reverse target speeds. You can even adjust your speed on the fly with the thumbwheel.

MAKING THE MOST OF AVAILABLE TORQUE
New Holland developed the Auto Command transmission to exploit the low running speed and high torque of FPT Cursor 9 engines. With 25-mph ECO, the engine can run at a fuel-efficient 1400 rpm.

ACTIVE STOPSTART
A key safety feature of Auto Command is Active StopStart. When you bring the tractor to a standstill, the transmission prevents the tractor from moving backward or forward—even when transporting fully loaded trailers or hauling manure. When you start out from a stop, there is no risk of rollback on steep inclines. For safe parking, engage the electronic brake using the shuttle lever.
UNMATCHED HYDRAULIC FLOW AND FLEXIBILITY

Quick hydraulic response and ample flow are an integral part of the GENESIS® T8 tractor design. You have the capacity, control and flexibility to perform multiple hydraulic functions simultaneously—without sacrificing performance.

MEGA FLOW™ PUMP
Standard hydraulic flow is a generous 44 gallons per minute. With the additional Megaflow™ pump option, capacity climbs to a massive 75 gallons per minute.

EFFICIENCY IS PART OF THE DESIGN
While GENESIS T8 tractors excel at heavy tillage work, they’re also designed for extreme efficiency during PTO and hydraulic applications. The GENESIS T8 PTO and hydraulic system is fully integrated with Engine Power Management to deliver not only high performance, but optimum economy too. GENESIS T8 tractors reach rated PTO speed at reduced engine speeds for maximum fuel efficiency.

CUSTOM HEADLAND MANAGEMENT
Automated features are only useful when operators feel comfortable using them and when they deliver operating flexibility. The refined New Holland Custom Headland Management system combines simple programming and recall with the potential for advanced modifications to make it even easier to improve in-field efficiency. The system allows operators to record and store the sequence of operations at the headland, and play the sequence back automatically with the push of a button. To modify pre-programmed sequences, operators use the IntelliView™ monitor to fine-tune tractor actions so they are right for every individual field and crop. It’s also a great way to reduce fatigue over extended working periods.
UP TO 6 ELECTRONIC REMOTES
GENESIS T8 remote valves are easy to identify with color-coded couplers and levers. You can control all six remotes without moving away from the SideWinder™ II armrest. It’s easy to identify and work each remote with exact precision. Four remote levers are on the armrest and two valves are controlled either using the two additional paddles located to the right of the IntelliView™ monitor, by using the CommandGrip™ multi-controller or by using the electronic joystick. You can set flow, timing and detent settings to precisely match the job. You can also program each valve with the Custom Headland Management system.

EASY FLOW CONTROL USING INTELLIVIEW
The Intelliview™ touchscreen makes setting the flow rates for individual valves simple. Scroll through the menus and select valve control. Choose the outlet you want to adjust, and drag the slider with your finger to the desired setting. Job done.
From the outset, GENESIS® T8 Series tractors were designed to work with implements on the front as well as the rear.

**HEAVY MOUNTED EQUIPMENT MEETS BIG LIFT CAPACITY**

With a rear lift capacity of up to 19,900 pounds on the GENESIS T8.435, a GENESIS T8 Series tractor has the rear linkage capacity to cope with the heaviest of rear attachments. Of equal importance, high-capacity hydraulics also allow you to raise the linkage quickly for speedy headland turns. With Custom Headland Management, you can set the hitch raise and lower positions as part of an automated turn sequence.
FACTORY-FITTED FRONT HITCH AND PTO
Equip your GENESIS T8 with the optional fully integrated front PTO and three-point hitch, and the GENESIS T8 not only handles the load, it excels at the job. The slim engine hood provides excellent forward visibility. The balanced long wheelbase makes it easier to make full use of the 12,800-pound (5810 kg) front lift capacity. Integrated electronic front linkage controls are easy to reach and use. A retrofit front linkage and PTO package is also available.

FLEXIBLE BALLASTING
Thanks to New Holland’s optional fully-integrated front linkage, ballasting is now even easier. You can choose from a host of front ballasting options to perfectly suit individual applications. You can quickly and simply fit and remove ballast from the comfort of the cab.

OPTIONAL FRONT LOADER
Your GENESIS T8 tractor and the 885TL front-end loader are an unbeatable team. A lift height of 16 feet and lift capacity of 6,217 pounds allows you to move large loads of material quickly and efficiently. A Quick-Attach loader design allows you to attach and remove the loader as needed. Bucket and attachment changes are easy, too.
New Holland designed GENESIS® T8 tractors to spend more time working and less time in the yard. All service points are easy to access, and super-long service intervals mean GENESIS T8 tractors spend more time in their natural environment: the field.

- Engine air filter and tool box are located to the left side of tractor for easy access.
- Cooling package opens out to make cleaning faster and easier.
- A built-in step makes reaching the front windshield for cleaning safe and secure.
- Top up the wash bottle through the rear window.
- Right-hand steps assist in cleaning right door window to improve visibility when working.
- Engine and hydraulic oil check and fill points are easy to reach making routine checks fast and servicing simpler. It also boasts an impressive 600 hour engine service interval.
- Single-piece engine hood opens wide for full service access.
WILL I BE ABLE TO FIND ADBLUE®/DEF EASILY?

The answer is yes! ADBLUE® diesel exhaust fluid is available through CNH Industrial Parts & Service. Just contact your local dealer for more information. You can even have ADBLUE delivered direct to your doorstep for absolute convenience.

DEALER INSTALLED ACCESSORIES

Your dealer can supply and fit your GENESIS T8 Series tractor with a comprehensive selection of approved accessories to optimize machine performance in all conditions.

There's a certain way of thinking that comes from living on a farm. Farming takes equal parts brain and brawn. Not to mention thick skin, calloused hands and a fair share of know how. Seasoned farmers know it helps to have equipment that's built by farmers, sold by farmers and used by farmers.

Support at every step. When you place your confidence in New Holland agricultural equipment, you get the finest in local support. Your New Holland dealer understands the many challenges you face and stands behind you at every step with the equipment, parts, service and financial solutions to make your job easier. Look to New Holland for a complete selection of equipment, including a full line of tractors, hay & forage equipment, harvesting, crop production and material handling equipment.

Quality parts and service. Turn to your New Holland dealer after the sale for expert, factory-trained service and genuine New Holland-branded parts. Your dealer has the very latest service updates and training to ensure your equipment keeps working productively season after season.

Financing solutions. Your New Holland dealer can tell you about smart ways to turn your financial challenges into opportunities with a portfolio of innovative financial services available through CNH Industrial Capital, including customized financing, leasing, insurance and the purchasing convenience of a Commercial Revolving Account.

For reliable equipment, parts and service — or just honest advice on farming and finance — turn to New Holland and your trusted New Holland dealer. We know. We’re farmers, too.
