

# Proven test results

that make the competition green with envy.

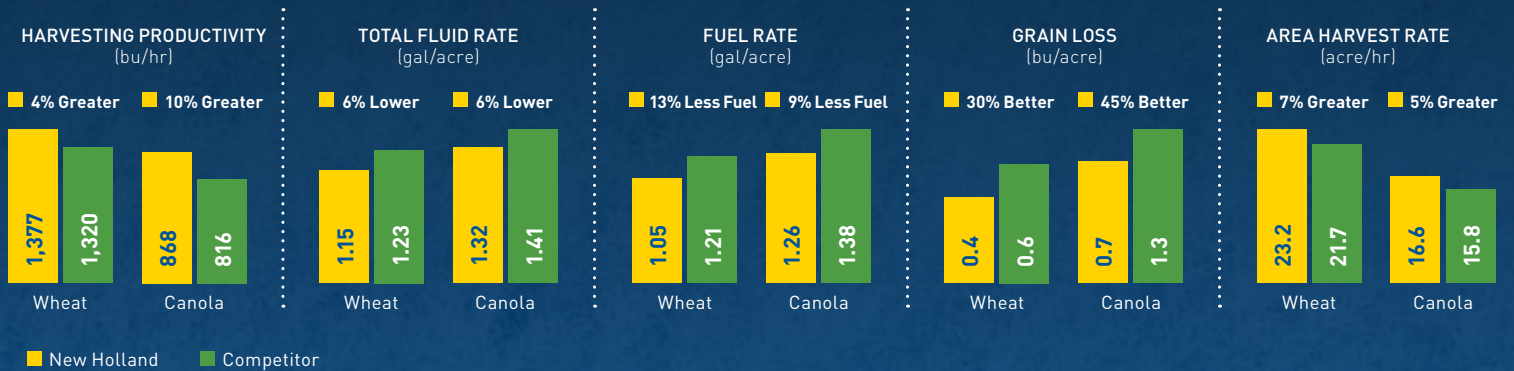

Independent third-party testing shows how productive and efficient a New Holland CR combine can be. Here's how New Holland interprets the test results:

- MORE HARVESTING PRODUCTIVITY:** 4% more in wheat and 10% more in canola
- LESS TOTAL FLUID CONSUMPTION:** 6% less in both wheat and canola for lower operating costs
- LESS GRAIN LOSS:** 30% lower in wheat and 45% lower in canola means more grain in the bin

It all adds up to more profit for you and more money in your pocket. But don't take our word for it! Get your copy of the independent third-party report today by visiting [www.myNewHolland.com](http://www.myNewHolland.com).

**WHAT DOES THIS MEAN?**  
A higher return on investment.  
**Take a look!**

On a 5,000-acre farm (2,500 wheat and 2,500 canola), the savings achieved by operating the New Holland combine translates into:

- Total fuel savings: 425 gallons or \$1,900
- Faster harvesting: Shave off 2 days
- More cash in the pocket due to lower combine losses: \$16,600
