

St Valentin: 25th January 2021

Case IH and STEYR turn up the heat for extra-strong paintwork

Tractors made at the St. Valentin, Austria plant will now have extra-strong paintwork thanks to a new million euro paintshop investment/ Higher gloss finish resists scratching, cracking and rust.

Case IH and STEYR tractors are now leaving their St. Valentin, Austria plant with upgraded paint finishes that are even tougher and more rust-resistant. The improvement comes thanks to a 1.1 million euro investment in new pre-treatment and paintshop facilities at the factory, completed despite the challenges of Covid-19.

Customer interest in robust paint and corrosion resistance, identified in ongoing market research, drove the initiative. Working with 24 specialist suppliers and partners, the factory came up with a menu of solutions before, during and after the painting process. Together they produce a higher-gloss finish that resists scratching, cracking and rust, while adhering more tightly to the metal's surfaces.

Significantly higher prewashing- and preheating-temperatures are key to the new finishes initiative. Each tractor is now dried at 110°C, up from 60°C, and stays in the oven three times longer. Initial prewash has gone from 30 - 40°C to 55 - 60°C with a fivefold increase in nozzle pressure.

"Getting the tractor absolutely perfect to receive its paint finish is vital," says Hannes Woegerbauer, Plant manager. "After the improved prewash, we also now have a separated rinsing process to remove excessive detergent and a new pre-heating booth that removes every molecule of moisture and warms the tractor to the perfect temperature. As a result, the paint is dried also from inside out, making it more stable, with much better adhesion and rust prevention".

Work started on the changes to the working production line in November 2019 and the first tractors passed through in August 2020. "We're really grateful to our specialist partners who have helped us put these new systems in place, while having to work around all the challenges of Covid-19," says Hannes. "Our customers are already seeing the benefits on their new tractors as they use them on their farms across Europe."

PRESS RELEASE

Press releases and photos: <http://mediacentre.caseiheurope.com>

Case IH is the professionals' choice, drawing on more than 175 years of heritage and experience in the agricultural industry. A powerful range of tractors, combines and balers is supported by a global network of highly professional dealers dedicated to providing our customers with the superior support and performance solutions required to be productive and effective in the 21st century. More information on Case IH products and services can be found online at www.caseih.com.

STEYR has been synonymous with leading technology and high-quality machinery for more than 70 years. Its premium Austrian-built tractor range focuses on outstanding comfort and precision operation, using proven technical innovations to maximise productivity for operators in the agricultural, forestry and municipal sectors. STEYR customers are backed by first-class support from STEYR's professional and highly experienced network of dealers. More information on STEYR products and services can be found online at www.steyr-traktoren.com.

Case IH and STEYR are brands of CNH Industrial N.V., a world leader in capital goods listed on the New York Stock Exchange (NYSE: CNHI) and on the Mercato Telematico Azionario of the Borsa Italiana (MI: CNHI). More information about CNH Industrial can be found online at www.cnhindustrial.com.
